FREQUENCY DISTRIBUTION OF NUMBER OF TAXPAYERS PER ENTRY IN 1327 SUBSIDY SUBDIVIDED BY FREQUENCIES OF TAX AMOUNT

Source: P.R.O., E179/159/4.

Notes: The 8 entries with more than 40 taxpayers were omitted due to the skewness of the original taxpayers' frequency distribution (see Figure 4.9 b).

In Figures 4.29 - 4.32 the class ranges of tax amounts and hearths are such that the smallest values are represented by the smallest dashed lines, and the highest values by the longest dashes.

Source: P.R.O., E179/159/122, 123, 124, 125, 134, 135, 140, 141.

Note: The 3 entries with more than 40 taxpayers were omitted due to the skewness of the original frequency distribution (see Figure 4.15 b). Similarly Holme was omitted due to its high tax assessment when compared with its taxpayers (see Appendix E). This enables the region of the frequency distribution, where several classes of one variable occur for each class of the other, to be studied in more detail.

Notes:

(1) The 1334 assessment has been multiplied by 15 in the case of rural taxation units and by 10 for the boroughs and ancient demesnes to produce an overall figure comparable with the 1327 Twentieth.

(2) The 1434 deduction is for South Collingham and Danethorpe combined.

(3) In 1334 the taxation unit used was Lenton, Radford and Keighton; in 1327 it was simply Lenton.

For 1327 the damaged entries have been left blank. The order of the taxation units is that in which they occur in the 1334 assessment.

* Indicates that the 28/9 Elizabeth I roll is damaged, and that therefore the 8 Elizabeth I roll (P.R.O., E179/160/200), which elsewhere is virtually identical to that of 28/9 Elizabeth I, has been used.

In the compilation of this Appendix the townships are generally shown in the order in which they occur in the 1334 and 1586 rolls. The only exceptions are where joint entries in 1524/5 prevent this.

Notes:

(1) The 1586 assessment has been multiplied by 15 for rural taxation units and 10 for boroughs and ancient demesne to produce figures comparable with the 1334 assessment, in shillings.

(2) In 1524 Welham, Moorgate and Bolham were probably included under the heading of Clarborough cum membris, as was Little Gringley.

(3) In 1524/5 the entry is for Harworth, Limpool and Hesley, whereas in 1586 it is for Harworth, Hesley, Martin, and Plumtree. Since Martin and Plumtree are not assessed elsewhere in 1524/5 it seems most probable that they were included with Harworth.

(4) Entry for Norton and Cuckney in 1524/5, but for Cuckney cum membris in 1586.

(5) In 1524/5 the entry is simply for Worksop; in 1586 it is for Worksop cum membris.

(6) The 1524/5 returns for Broxtow Wapentake are defective.

(7) In 1524/5 Alverton, Flawborough, and Kilvington were probably included in the entry for Staunton.

(8) In 1524/5 Danethorpe was probably included in the entry for South Collingham.

(9) For Clumber in 1524/5 see under Bassetlaw Wapentake. In 1586 there were two assessments for Clumber, one under Bassetlaw and the other as Ancient Demesne.

(10) For Ragnall in 1524/5 see under Bassetlaw Wapentake.

Notes:

(1) Damaged, but probably reads "Marnham", although Marnham Chaworth is recorded elsewhere.

(2) Possibly "North Lathes", or more likely "Park Lathes" adjacent to Kelham.

(3) Damaged, but probably reads "Weston".

(4) Damaged, but appears to read "Alverton". The high assessment value for this place would suggest that it was not in fact Alverton, especially since there is also an entry for "Staunton cum membris", which elsewhere includes Flawborough, Kilvington and Alverton. Nevertheless the position of this entry, between East Stoke and Staunton, when compared with Appendices C and E, would suggest that it was indeed Alverton.

(5) On the reverse of E179/160/280, the subsidy list for Nottingham, there appear to be approximately ten further, very faded, entries.

Notes: (1) The term "Hundred" is used in the Hearth Taxes rather than Wapentake.

(2) Papplewick is mentioned in a separate section under Rushcliffe Hundred as belonging to Broxtow Hundred.

(3) In 1664, Missen is mentioned separately both under the North Clay and the Hatfield divisions of Bassetlaw.
