**Preface:**

Some of the images in this thesis have been removed due to copyright reasons. Where this is the case, a short description has been added within the body of the text. I have written permission by the late Prof. Vera Evison and her colleague Valerie Cooper to use illustrations from the reports produced by Evison for my research. Furthermore I have permission to illustrate the image of the brooch from the cemetery at Oxborough, Norfolk by the Historic Environment Service, Norfolk County Council (see below for details on the brooch).

Mucking II, Esx 979	Poss M A	(Leaded) copper-alloy strap end; Leaded gunmetal moulded composite buckle and buckle plate; copper-alloy disc belt attachment, Rectangular plate with curved over terminal inside which the end of the strap would fit. Curved end has moulded transverse ribbed decoration with alternating one wide and three narrow ribs. Junction of curved end and flat plate marked by double grooved border around edge with additional row of punched circles inside the border. Grooved border is apparently truncated at one end, intact and has rivet in corner of border while at the other end has rivet is inside the border edge and missing. Object is slightly shorter than matching buckle plate, all suggesting that plate may have been damaged along line of original rivet hole in corner and then trimmed off for reuse; fixed over the front of the end belt, with an oval hole corresponding to the inside of the buckle loop and cut of the belt. The buckle/plate terminates in a curved edged plate fitting over the end of the belt, similar grooved decoration, transverse on the end,	After Hawkes and Dunning (1963) rosette disc attachment type VI, (illus. p. 67), buckle: Type III B, example g (p. 58)

		<p>consisting of alternating one wide and three narrow ribs), and a double vertical groove marking the junction of the curved and straight sections; within the grooved border is a row of punched circles. The buckle loop is elongated oval with a straight ribbed hinge bar, at each end of this is an open jawed animal head with ears and a punched circle for an eye, a row of punched circles decoration. Cast decorated disc forms one end of a bronze strip bent back on itself to form a loop, with separate leaded bronze ring slung on the loop. Ring has raised lip around into edge, V-shaped nicks and four concentric grooves on Rosette disc</p>

Buckland, Knt, 377	Child	Horse Harness pendant, dimensions: L: 61mm W:45mm, rounded knob with transverse moulding below. Pear drop form with abstract patterning in light relief, based on four lozenge patterns with curved sides. Circular opening with oval extension above, small circular perforation just below this	Identified by Riddler (2012): Early Roman date, teardrop form, maybe derived from a "Tropfen" form (Deschler-Erb 1999, 57, see also Tafel 30, example 589)
Sarre, Knt 148	F	Equestrian <i>Riemenöse</i>	Unusual form but from its shape and components, it might be identified as <i>Riemenöse</i> , similar to examples 716/718 after Deschler-Erb (1999), (Tafel 38)
Sarre, Knt 17	F A and child	Bronze model of an axe, dimension: L 2.54cm, Broken off at handle, similar to those found at Caistor and Felixstow in Suffolk, but no hole for suspension remaining, others have been found at Rennes with Roman remains	After Mackreth (2010): Axe brooches, enamelled, bilateral springs mounted btw pierced pair of lugs, broad dating 2 <sup>nd</sup> to 3 <sup>rd</sup> century, (p.180, ill. p. 126), this seems more plausible than miniature axes found at Lankhills (see Clarke 1979, p.327, illus.fig, 87)
Sarre, Knt 187	F	Strap terminal, dimension: L: 6.35cm	Difficult to identify from drawing but shows

			similarities with example 4e of Bishop's classification (1988) (p.164, fig. 52)
Sarre, Knt 23	Child	Nautilus shaped ornament, made of green stone or porcelain and pierced for suspension	Not illustrated, but description suggests that it is possibly Roman, as it is made of porcelain or green stone (which might be a reference to marble)

**Table 4.9. Bracelets**

Site's Name	Skeletal information	Description	Classification
Bifrons, Knt 6	U	Copper-alloy penannular brooch, re-used as bracelet, 6.6cm in diameter, Hoop of round sectioned, with flattened terminals cast in form of rudimentary animal heads, Pin missing	--
Chartham Down, Knt 16	Poss F	Two copper-alloy rings, hook and eye fastening and split joint	After Crummy (1983), example of snake head with punched eyes p.44, ill. 43, hook and eye fastening similar to bracelets illus p. 39 and 40 (descr. 38)
Lyminge, Knt 16	U	Copper-alloy bangle, decorated terminals	After Crummy (1983), Transverse grooves on terminal, panel showing an elegant cross, p. 40, ill. 42)
Great Chesterford, Esx 31	Infant 12 - 18 months	Copper-alloy bracelet, 3.7cm in diameter, Roman strip bracelet with hook and eye fastening, undecorated and similar to Lankhills	After Manning (1985): strip bracelets with a D shaped cross section, hook and eye fastening, undecorated (p. 306, fig. 89), bracelets of this sort were common in the 4 <sup>th</sup> century
Spong Hill, Nfk 51	U	Fragment of Roman bronze hook-and-eye bracelet, very worn eye, decorated with group transverse lines below eye and single line along edge	Not illustrated but hook and eye fastening has been suggested to date to 4 <sup>th</sup> century (after Manning 1985).

**Table 4.10. Tweezers**

Site's Name	Skeleton	Description	Details
Lackford. Sfk 49,581	C	Tweezers	provincial Roman workmanship
Lackford. Sfk 49,580	C	Tweezers	Provincial Roman, unused
Lackford. Sfk 49,19	C	Tweezers, unused	Unused
Holywell Row Sfk 51	U	Tweezers	Incised lines on bronze wire together with ear pick

Caistor by Norwich, Nfk K7	C	Copper-alloy tweezers, well made and functional, dimension: L 7.4cm	Top of tweezers is expanded to form a loop. Threaded through this loop is a D-shaped loop of wire, the arms of the tweezers are decorated with groups of horizontal incised lines
Caistor by Norwich, Nfk M28	C	Copper-alloy tweezers, distorted by heat, dimension: L 7.1cm	Arms are notched and decorated with incised horizontal lines, the ends of arms are slightly constricted to form a small loop, and decorated with two incised lines
Caistor by Norwich, Nfk N28	C	Copper-alloy tweezers, of Roman type, dimension: L 5.8cm	Distal ends of the arms are greatly expanded and the proximal ends are constricted to form a terminal loop. The arms are ornamented with incised parallel horizontal lines and notches, in this zone and round the loop the edge is faceted
Markshall, Nfk IX	C	Copper-alloy tweezers, dimension: L 7cm	Tweezers have a loop made constricting the two arms, the arms expand below this, the arms are decorated on either side by thread then two engraved horizontal lines set just below the loop. Smaller and more elaborate décor
Spong Hill, Nfk	C	Copper-alloy tweezers, unpublished	Identified by Green (1973), 105

**Table 4.11. Intaglio**

Site's Name	Skeletal information	Description	Classification
Buckland, Knt, 407	F 23-28 y	Intaglio, jasper, oval with bevelled edge	Identified by Parfitt, Anderson (2012), 440
Buckland, Knt, 391B	F 20 - 25 y	Intaglio set in silver slings, suspended in a Copper-alloy slip knot ring, diameter 29mm, Weight 14.9g, Crystal flattened on one side, convex on the other. Intaglio represents the Lydian queen Omphale, engraved in the flat face. Stone chipped, decoration largely covered by a sling. Sling decorated with grooves and punched triangles, worn, very little	After Henig (2007): Two intaglios depicting Omphale, one known from Fox Hill, West Wockham, Kent, the other from Wroxeter, Shropshire. The depiction of the intaglio on flat oval glass from Kent was similar in style as the one from Buckland and is dated by Henig to the 1 <sup>st</sup> century AD (p. 147, ill. 228)

		remains of gilding, broken and repaired with thread fastening broken ends.	
Lyminge, Knt, 32	M 12 - 15 y	Intaglio set onto silver plated iron buckle and a bronze kidney shaped attachment plate, figure of Athene, left hand on shield and bird in the right, decorative, from seal ring	After Henig (2007): Intaglio on red jasper is depicting Ceres, standing front and facing right, holding dish of fruit and corn-ears, probably 2 <sup>nd</sup> century (p. 134, ill. 223)
Snape, Sfk 1	Poss M	Onyx intaglio set into a gold finger ring, depicting standing figure of Bonus Eventus, hoop decorated with beaded and twisted wire granules, hook and eye decoration on the shoulders give a zoomorphic effect.	After Henig (2007): Bonus Eventus, standing front and facing left, holding patera and corn-ears, flat with bevelled edge, dated to 2 <sup>nd</sup> century AD
Sutton Hoo Sfk	Poss M	Intaglio Bonus Eventus, onyx	After Henig (2007)
Pakefield Sfk	U	Onyx Intaglio set in gold, warrior with spear, now missing	Identified by VCH Suffolk I, 347, Bruce Mitford (1975), 667

Hadleigh Road, Sfk 68	U	Marble fragment	Possibly Roman, no illustration, identified by Layard (1907),13

**Table 4.14. Miscellaneous metal objects**

Site's Name	Skeletal Information	Description	Classification
Bradstow School, Knt, 5	M 45+	Copper-alloy figurine, Roman statuary	Identified by Harrington and Brookes (2010) and through descriptions of similar statues in the British Museum by Walters (1899)
Chartham Down, Knt 26	U	Copper-alloy spoon/ spatula, dimensions: 17.78 cm in length, 1.91cm wide at the upper end	After Clarke (1979): shape similar to late 4 <sup>th</sup> century spoon found at Lankhills, (p. 256, fig. 103), see

			also Böhme (1968) typology of spoons in late Roman graves on the continent (p.174- 175, Abb. 2 and 3)
Chatham Lines, Knt 20	F A	Copper-alloy knife, Openwork, dog chasing hare	Dog chasing hare handles are known from Roman knives and zoomorphic handles of short length are discussed by Boon (1991) as toilet knives (p.22 – 24, illus. p. 22)
Eastry Bypass, Knt 35	U A	Copper-alloy pin head, comprising a man's bust, dimensions: 15mm in length, maximum of 8mm wide, Man's face, with long hair ending at the nape and covering the ears, long squared beard, well defined moustache	After Crummy (1983): bust poss male from hair pin made of Copper-alloy, parallel Wilson 1986, p. 43, 166), p. 30, ill. 31, see also Cool (1990), (p. 168, group 18, fig. 10)
Gilton, Knt 98	U	Two copper-alloy instrument, Interpreted as surgeon instruments	After Crummy (1983), probably probes, similar form and function as spoon-probes (p.61)
Gilton, Knt 94	Poss F	Mirror, around 12.7cm in diameter, flat and circular; it is very highly polished on one side, which is convex	After Lloyd-Morgan (1977) p. 246f, Plate A, Proto group H, handle almost identical
Holborough, Knt 2	Poss M	Iron pot hanger, 0.64m in length, Hooked rod with twisted shank is linked to a second similar rod by means of a ring; to the farther end of the second rod is joined a row of five interlinked rings with a terminal doubled-over loop	After Manning and Webster rod is similar to lamp hanger from excavations at Ursk (p. 209, illus. 208 (see also Manning 1985, 99)
Holborough, Knt 7	M A	Copper-alloy spatula, 3.56cm in length, Rod incomplete and square in section, and widens to a flattened oval at the end	After Crummy (1983), similar oval shape of bowl, (p. 60, illus. 61, e.g. example 1927)
Holborough, Knt 11	U 12 - 15 y	Bowl of Iron Spoon, dimensions: 2.54 cm in length, circular, with remains only of shaft.	After Crummy (1983). Late Roman, cupped scoop, L 83.5mm, diam. 6.5., (p. 59, illus. 60)
Howletts, Knt, 26	F	Copper-alloy bowl	Identified by Harrington (2008)

Kingston Down, Knt, 222/299	Poss F	Iron and copper-alloy bell with chain	Quadrangular bell, after Eckardt (2018) Type 1, (p.183 illus. 184)
Ozengell, Knt, 100	F	Hanging chain from scales	Identified by Harrington (2008)
Riseley, Knt, 69	F 3 - 6 y	Cosmetic grinder	Identified by Harrington (2008), classified by Richardson (2005) as a bow shaped object for suspension
Riseley, Knt, 86	M A	Scabbard mount	Identified by Harrington (2008)
Saltwood, Stone Wall Bridle Farm, Knt W1453	U 25 - 35 y	Fragment of upper shaft of cast Copper-alloy cosmetic spoon probe, circular section, widening towards the upper end with rounded terminal	After Crummy (1983) Similar to spoon probe, approx.. early 2 <sup>nd</sup> century, (p. 60, illus. 61)
Sarre, Knt 259	U	Copper-alloy Bell fragments, burnt	After Eckardt (2018), possibly quadrangular bell, type 1 (p. 183, illus. 184)
Sibertswold, Knt 18	Poss F	Copper-alloy pin, L 6.35cm, Little wrought on one of its flat sides, seems to have been intended to represent two small animals, like monkeys, sitting upright on their posteriors, taking hold of each other's fore paws and kissing each other	After Cool (1990) animal headed pins are rare but show much diversity and are a phenomenon of the late Roman period (p. 168, group 18)
St. Peter's Tip, Knt 252	U	Copper-alloy pin/bodkin	Identified by Harrington (2008)
St. Peter's Tip, Knt 76	F 18 – 25y	Bronze scales with coin	Identified by Harrington (2008)
Temple Farm, Knt 3	U	Rim of drinking horn, imported Gallo-Roman drinking horn mount with repousse Christian decoration, lip only	Identified by Harrington (2008)
Great Chesterford, Esx, 116	F 35 - 45 y	Copper-alloy Pin, L 14 cm, Flat disc head, identified by Evison as possible Roman ear probe	Classified after Henig (1986) p. 11, fig. 4, 15 and 16 from finds from Great Chesterford, Esx
Great Chesterford, Esx, 117	M 35-45 y	Iron Hobnail, L 1.4cm	After Clarke (1979), hobnail with dome shaped head, similar to those found at Lankhills (p.322f)
Great Chesterford, Esx 54	M 45 +	Iron razor L 6.5cm	After Manning (1985), razor with curved back, as found from Walthamstow, Essex (p.115, illus. plate 55, Q49)
Great Chesterford, Esx 58	Infant	Iron Hobnail L 1.5cm	After Clarke (1979), hobnail with dome shaped head, similar

			to those found at Lankhills (p.322f)
Great Chesterford, Esx 98	Infant 0 - 2 months	Iron Hobnail L 1.2cm	After Clarke (1979), hobnail with dome shaped head, similar to those found at Lankhills (p.322f)
Great Chesterford, Esx C12	C Ju	Iron rivet, Dome headed	After Clarke (1979), hobnail with dome shaped head, similar to those found at Lankhills (p.322f)
Mucking II, Esx 350	Poss F A	Copper-alloy terret ring, dimension: L 9mm, W 11m, Used as slide buckle	After Crummy (1983): terret similar to Colchester type, period 5c, Copper-alloy terret, (p.106, ill. p. 106)
Lackford Sfk 48, 2474	C	Copper-alloy spoon	After Crummy (1983) Type 1, 2 <sup>nd</sup> century, spoons with round bowl (p. 69, illus. 70, fig. 2008)
Lackford Sfk 49, 582	C	Guard of a sword and a piece of the ivory hilt	After Lethbridge (1951) fragment of a similar hilt was found at the Roman fort of Richborough
Lackford Sfk 50, 172A	C	Piece of a flanged bronze bowl identified by Lethbridge (1951) as Roman	Decoration similar after pewter vessels in Clarke (1979), p.206, illus. fig. 97, 528F
Morning Thorpe, Nfk 215	C	Terret	After Crummy (1983) Type 1, 2 <sup>nd</sup> century, spoons with round bowl (p. 69, illus. 70, fig. 2008)
Spong Hill, Nfk 1672	C	Razor, bronze griffin headed handle	After Boon (2011) similar example in Ashmoleon Museum from Naronia (Dalmatia) and in grave at Netta Poland, barbarian grave, reused p. 28-9, fig.3f
Caistor by Norwich, Nfk 8		Iron nail with large head, tip of shank missing. Hook, pointed at one end and expanded at the other, rectangular in section	After Manning (1985): Nail, type 1 square sectioned, tapering stem with rounded or rectangular head and R85 (plate 63, p.134-5) Hook similar to R22, from Hod Hill, Dorset, L 6.8cm, perhaps mid first century, rectangular

			sectioned with a slightly turned out tip, (p.129, plate 59)
