Philosophy in the University of Durham, November 1978.

## APPENDICES

A P P E N D I X I

Glossary

(In Alphabetical Order)

Ahdut ha Avoda. 'Unity of Labour' Party. Split from Mapai in 1942 and from Mapam in 1954. Somewhat more socialist in orientation than Mapai. In 1968 joined with Mapai and Rafi to form the Israel Labour Party, thereafter operating as a faction within Labour.

Alignment. (Ma'arakh) Refers to the common electoral front of Mapam and the Israel Labour Party from 1969 onwards.

Artzi. See 'Ha Kibbutz ha Artzi'.

Beitar. Acronym for 'Brit Yosef Trumpeldor = Yosef Trumpeldor Association. Revisionist Zionist (Herut) youth movement (See 'Ten' uat Herut-Beitar).

Bnei Agiva . NRP youth movement.

Displaced Persons. In the context of the 1967 West Bank out-movement this refers exclusively to native West Bankers.

Eretz Yisrael. 'The Land of Israel' - the biblical/historical territory of the Jewish people. Roughly coterminous with the area termed 'Palestine' (incorporating present-day Israel, Judea-Samaria, Gaza and much of Transjordan), though varied greatly in extent through the biblical period. In current political usage it generally refers to 'Western Eretz Yisrael', which excludes areas east of the Jordan River and is identical with the territory of the former Palestine Mandate (Israel, Judea-Samaria, Gaza).

Fatah. Reverse acronym for 'Harakat at Tahrir al Watani al Falastini' = Palestine National Liberation Movement. Principal Palestinian guerrilla organisation and headed by Yassir Arafat.

Gahal. Acronym for 'Gush Herut - Liberali' = Herut-Liberal Block. Product of 1965 alignment between the Herut and Liberal Parties.

Green Line. Israeli term for the 1949-67 armistice lines between Israel and her neighbours.

Gush. Hebrew for 'block' (of land or of people).

Gush Emunim. See P.288 in the main text.

Ha Ihud ha Haqlai. 'The Agricultural Union' Moshav Movement. Association of smallholder settlements independent of any particular political affiliation. 35 moshavim and 2 moshavim shittufiim in 1974.

Ha Kibbutz ha Artzi. 'National Kibbutz'. Currently the largest Kibbutz Movement. Main base of support for the Mapam faction. 1974-75 settlements with a combined population of 32,800. Founded in 1927.

Ha Kibbutz ha Meuhad. 'The United Kibbutz'. Settlement Movement politically oriented toward Ahdut ha Avoda. 1974-55 settlements with a combined population of 25,100. Founded in 1927.

Ha 'Oved ha Tzioni. 'Zionist Labour' Moshav Movement. Small federation linked with the Independent Liberal Party. 12 moshavim and 6 moshavim shittufiim.

Ha Po'el ha Mizrahi. 'Eastern Labour' Moshav Movement. Religious moshavim (all aspects of public life governed by the Torah) associated with the National Religious Party. 56 moshavim and 4 moshavim shittufiim in 1974.

Herut. 'Freedom' Party. The organ of revisionist Zionism after 1948 and Israel's largest right-wing political faction. Strongly attached to the idea of Israeli control over the whole of western Eretz Yisrael and favouring a less 'socialized' economy. Joined with the Liberals to form Gahal in 1965 and with other smaller parties to form Likud in 1973.

Ihud ha Kevutzot ve ha Kibbutzim. 'Union of Kibbutzim'. Settlement movement politically associated with Mapai. 1974-77 settlements with a combined population of 29,300. Founded in 1951.

Independent Liberal Party. Small centrist faction. Aligned with Liberals 1961-65. Reverted to former independence when Liberals joined Herut in Gahal. Gradually reduced from 5 Knesset seats (1966) to 1 seat (1977).

Jewish Agency. Established in 1929 as the organizing agency for Jewish activity under the British Mandatory regime in Palestine. After the establishment of the State of Israel the Jewish Agency continued as a semi-autonomous bureaucracy responsible for immigration and land settlement - the internal arm of the World Zionist Organization. Its relationship with the Government was regulated by the 1954 'covenant', setting up a co-ordinating board through which the Government effectively exercised control.

Jewish National Fund. 'Keren Keyemet le Yisrael'. Established by the Zionist Organization in 1901 to acquire land in Palestine for agricultural settlement. After the establishment of the State the National Fund became primarily concerned with land development - soil preparation, afforestation and rural road works.

Kibbutz. Collective settlement. Collective principle applies in all spheres of life. Land is worked in 'common' and families live in a communal framework, for example eating in a single dining hall. Although agriculture is the most characteristic activity many kibbutzim also engage in industrial production and service provision. Settlement populations range from c.100 to c.1500.

Knesset. The unicameral Israeli Parliament. 120 members elected every four years by universal suffrage under proportional representation.

Labour Party. Product of Mapai/Rafi/Ahdut ha Avoda union in 1968. Thereafter Israel's dominant political grouping and coalition leader up to the 1977 election.

La'am. 'For the People' (formerly known as State List). Small faction in Likud. Formed (as State List) in 1969 by Rafi members who rejected Rafi's 1968 attachment to the Labour Party.

Liberal Party. Right of centre party associated with Herut in Gahal (1965) and Likud (1973). Represents powerful business interests and primarily concerned with economic matters (as illustration see Cabinet posts occupied in 1977 Likud administration - Appendix II P.375).

Likud. 'Unity'. Right of centre alignment formed in 1973 by Gahal (Herut, Liberals), State List, Free Centre. United by hostility to 'socialism'. Emergence (on initiative of Ariel Sharon) ominous for Labour as it gave Herut greater respectability and a more moderate appearance.

Mapai. Acronym for 'Mifleget Po'alei Eretz Yisrael' = Israel Workers Party. Israel's dominant political faction up to the 1968 formation of the Labour Party. Thereafter continued as the major source of political power within Labour. Social-democratic.

Mapam. Acronym for 'Mifleget Po'alim Me'uh edet' = United Workers Party. A socialist-Zionist party to the left of Labour in Israel's political spectrum. Since 1969 has formed the 'Alignment' with the Labour Party.

Mekorot. 'Sources' - Israel's national water company. Implements and manages water supply projects.

Meuhad. See 'Ha Kibbutz ha Meuhad'.

Moshav. Co-operative agricultural village, generally comprising 60-100 families. Land is held individually (though not privately owned), members have private incomes and families live separately from one-another. Members only come together for marketing, bulk purchasing and the operation of central facilities and services.

Moshav Shittufi (Co-operative Moshav). Intermediate between co-operative (moshav) and communal (kibbutz) organization. 1) Land is worked in 'common' with income being equally divided between members but 2) families live separately and arrange their household budgets individually.

Nahal. Acronym for 'No'ar Halutzi Lohem' = Fighting Pioneering Youth. Military-agricultural settlement corps of Tzahal. Soldiers serving in Nahal spend a large portion of their compulsory military training period (three years) in establishing and maintaining agricultural outpost settlements in frontier areas. Since 1967 Nahal has been used as a spear-head for a considerable portion of the occupied territory colonization and it operates in close collaboration with the Settlement Department of the Jewish Agency and with Settlement Movements. Nahal (paramilitary) settlements can move through three phases :

1) Ma'ahaz. Small outpost with no extra-military activity, but intended to evolve into a settlement.

2) He'ahazut. Still paramilitary but members of the unit also engage in non-military activity, usually but not necessarily agricultural.

3) Hitnahalut: Settlement becomes civilian. Can happen when an original Nahal unit completes its military service and remains as a civilian nucleus or when an entirely different civilian group moves into a site prepared by a Nahal unit. It is generally only at this stage that permanent accommodation is built and that population rises over c.60 - the Ma'ahaz and He'ahazut stages use tents, prefabricated huts and derelict buildings.

It should of course be noted that many occupied territory settlements have never gone through a Nahal period (having been civilian from the outset) and that Nahal outposts do not necessarily ever become permanent civilian villages.

National Religious Party (Mafdal - Miflaga Datit Leumit). Israel's largest political faction with an orthodox religious base. Founded in 1956 by union of Mizrahi (orthodox Zionist group) with its labour arm, Ha Po'el ha Mizrahi. Regular partner in governing coalitions. Until 1974 the main tendency of the NRP was 'moderate', but between 1974 and 1977 it became increasingly influenced by the mystical religious fundamentalism of Gush Emunim. 1978 saw the party severely split between 'moderate' and 'millennial' wings.

National Water Carrier. Canal and pipe system transferring water from Lake Tiberias to the northern Negev.

Palestine Liberation Organization (PLO). Executive of the guerrilla organizations. Since 1969 dominated by Fatah.

Popular Front for the Liberation of Palestine (PFLP) Palestine guerrilla organization. More radical than Fatah. Founded by George Habash.

Rafi. Acronym for 'Reshimat Po'alei Yisrael' = Israel Workers List. Split from Mapai in 1965 - headed by Ben Gurion, Dayan, Peres. Stood to the right of the central tendency in Mapai and, despite Ben Gurion's personal opposition to major boundary adjustments after the June 1967 War, it became identified as a proponent of large-scale territorial expansion by the early 1970's (through Dayan and Peres). In 1968 merged with Mapai and Ahdut ha Avoda to form the Labour Party, thereafter operating as an internal faction. By 1975 it had largely lost its separate identity.

Settlement Movement. A settlement, whether moshav or kibbutz, tends to have a particular ideological orientation and on this basis is affiliated to a Settlement Movement (a national federation of communal/co-operative villages with similar social and political outlooks. Movements are linked to political parties, in which they often possess great influence relative to their numerical strength, owing to their prominent role during critical formative phases of Israel's political history. This especially applies to factions making up the Labour Mapam Alignment.

Sheli. 'Shalom/Shivyon le Yisrael' = Peace/Equality for Israel. Front of leftist splinter groups formed for 1977 elections. Favours near-total withdrawal from occupied territory.

Tahal, Acronym for 'Tikhnun ha Maim le Yisrael' = Water Planning for Israel. Directs planning and research for all forms of water supply and distribution.

Tenu'at ha Moshavim. 'The Moshav Movement'. Israel's largest Moshav association. Closely linked with the Histad (Federation of Labour) and politically oriented toward the Labour Party (before 1968 toward Mapai). 218 moshavim and 9 moshavim shittufiim in 1974.

Tzahal. Acronym for Tzavah Haganah le Yisrael = Israel Defence Forces (includes army, air force and navy).

Volcani Institute. Research Institute of the Ministry of Agriculture (plant biology, soil chemistry, irrigation, veterinary medicine).

Yishuv. Palestine Jewry under the British Mandate, 1920-1948.

Yisrael Galili	(Lab.Ahdut ha Avoda)	) Without Portfolio
Shimon Peres	(Lab. Rafi)	
Leo Doltzin	(Gahal Lib)	
Menahem Begin	(Gahal Herut)	
Victor Shemtov	(Mapam)	
Yisrael Barzilai	(Mapam)	

Health and Emmigrant Absorption still to be appointed  
- reserved for Mapam.

6.

Changes Dec. 1969 - Dec. 1973

## a) Parties

Sept. 1973 - Likud Alignment formed - agreement between Gahal, State List (later La'am), dissident Alignment group, Free centre - altogether 32 Knesset seats.

## b) Government

30 July 1970 - Gahal withdraws from Government due to Labour acceptance of 'Rogers Plan' (potential retreat from occupied territory).

5 March 1972 - Haim Bar Lev (Labour) Minister of Commerce & Industry - succession to Pinhas Sapir who held post with Finance.

30 Oct. 1973 - Shapiro resigns from Justice, no successor named.

7. 1973 Knesset Elections

Party/faction	No. of seats
Labour - Mapam Alignment	51
Likud	39
NRP	10
Torah Front (Agudat Yisrael + Poalei Agudat Yisrael)	5
Independent Liberals	4
New Communist Party	3
Civil Rights list (breakaway from Labour)	3
Arab lists (affil. to Alignment)	3
Moked	1

8. New Government, March 1974

Coalition dominated by Labour-Mapam Alignment.

## a) Coalition parties/factions

Labour-Mapam	16	Cabinet positions*
NRP	3	" "
Independent Liberals	2	" "

\* 14 Labour, 2 Mapam

## b) Ministers

Golda Meir	(Lab. Mapai)	Prime Minister
Yigal Allon	(Lab. Ahdut ha Avoda)	Dep. P.M. & Education
Abba Eban	(Lab. Mapai)	Foreign Affairs
Moshe Dayan	(Lab. Rafi)	Defence
Haim Bar Lev	(Lab. Mapai)	Commerce, Industry, Development
Haim Givatai	(Lab. Mapai)	Agriculture
Shlomo Hillel	(Lab. Mapai)	Police
Aharon Yariv	(Lab. Mapai)	Transport
Shimon Peres	(Lab. Rafi)	Information
Haim Tzadok	(Lab. Mapai)	Justice
Yitzhak Rabin	(Lab. Mapai)	Labour
Yehoshua Rabinowitz	(Lab. Mapai)	Housing
Aharon Uzan	(Lab. Mapai)	Communications
Victor Shemtov	(Mapam)	Health
Shlomo Rosen	(Mapam)	Immigrant Absorption
Moshe Kol	(Indep. Lib)	Tourism

Yosef Burg	(NRP)	Interior
Yitzhak Raphael	(NRP)	Religious Affairs
Michael Hazani	(NRP)	Social Welfare
Yisrael Galili	(Lab. Ahdut ha Avoda)	) Without Portfolio
Gideon Hausner	(Indep.Lib)	

9. New Government, May 1974

Labour-Mapam Alignment + Small parties (No NRP participation until Oct. 1974). 1 seat majority in Knesset.

a) Coalition parties/factions

Labour-Mapam	16	Cabinet positions*
Independent Liberals	2	" "
Civil Rights List	1	" position

\* 14 Labour, 2 Mapam.

b) Ministers

Yitzhak Rabin	(Lab.Mapai)	Prime Minister
Yigal Allon	(Lab.Ahdut ha Aboda)	Dep.P.M. & Foreign Affairs
Shimon Peres	(Lab.Rafi)	Defence
Yehoshua Rabinowitz	(Lab.Mapai)	Finance & Housing

Aharon Yadlin	(Lab.Mapai)	Education
Gad Ya'covi	(Labour)	Transport
Moshe Baram	(Labour)	Labour
Shlomo Hillel	(Lab.Mapai)	Police & Interior
Aharon Uzan	(Lab.Mapai)	Agriculture
Moshe Kol	(Indep.Lib)	Tourism
Victor Shemtov	(Mapam)	Health
Shlomo Rosen	(Mapam)	Immigrant Absorption)
Avraham Ofer	(Lab.Mapai)	Communications
Aharon Yariv	(Lab.Mapai)	Information
Haim Tzadok	(Lab.Mapai)	Justice & Religions
Yisrael Galili	(Lab.Ahdut ha Avoda)	) Without Portfolio
Gideon Hausner	(Indep.Lib)	
Mrs.Shulamit Aloni	(Civil Rights)	

10. Changes May 1974 - May 1977

Government

October 1974 - NRP rejoins the ruling coalition  
 Old portfolios returned (Yosef Burg - Interior, Yitzhak Raphael - Religious Affairs, Michael Hazani - Social Welfare)

Civil Rights list leaves coalition.  
 Knesset majority rises  
 Avraham Ofer becomes Minister of Housing  
Jan 1975 Yariv resigns - Yadlin takes over Information,  
 Uzan takes over Communications.  
Nov. 1975 Zevulun Hamer (NRP) becomes Minister of  
 Social Welfare (following death of Hazani)  
Dec. 1976 NRP Ministers resign - Rabin Govt. continues  
 as caretaker admin. until May 1977 elections.  
Jan. 1977 Avraham Ofer commits suicide.

11. 1977 Knesset Elections  
 End of Alignment rule.

Party/faction	No. of seats
Likud	43
(Herut - 19, Liberals - 15, La'am - 8, Free Centre - 1)	
Labour Mapam	32
Democratic Movement for Change	15
NRP	12
Democratic Front for Peace and Equality	5
Agudat Yisrael	4
Poalei Agudat Yisrael	1
Shlomzion	2
Shelli	2
Flatto-Sharon	1
United Arab List	1
Independent Liberals	1
Civil Rights Movement	1

12. New Government, June 1977

Likud dominated coalition (with religious parties)

a) Coalition parties/factions

Likud	9	Cabinet positions
NRP	3	" "
Independent (Dayan)	1	" position
Agudat Yisrael	)	Decline participation in Govt.
Poalei Agudat Yisrael	)	support in Knesset.

b) Ministers

Menaham Begin	(Likud-Herut)	Prime Minister
Simha Erlikh	(Likud-Liberal)	Finance
Moshe Dayan	(Independent)	Foreign Affairs

Ezer Weitzman	(Likud-Herut)	Defence
Ariel Sharon	(Likud-Shlomzion)	Agriculture
Yigal Horowitz	(Likud-La'am)	Commerce, Industry, Tourism)
Zevulun Hamer	(NRP)	Education & Culture
Yosef Burg	(NRP)	Interior & Police
Aharon Abu Hatzeira	(NRP)	Religious Affairs
David Levi	(Likud-Herut)	Immigrant Absorption
Yitzhak Moda'i	(Likud-Liberal)	Energy & Infrastructure
Gideon Patt	(Likud-Liberal)	Construction
Eliezer Shostak	(Likud-La'am)	Health

13. Changes, June 1977 - June 1978

Government

Oct. 1977 Democratic Movement for Change joins coalition.  
Portfolios : Yigael Yadin - Deputy P.M., Shmuel Tamir - Justice,  
Meir Amit - Transport and Communications, Yisrael Katz - Labour  
& Social Betterment.

Jan. 1978 Likud additions to Cabinet : Haim Landau (Herut)  
and Moshe Nissim (Liberal) - Ministers Without Portfolio.

The Refugees

- a) The Impact of the June 1967 War on Villages  
in the Ramallah and Jerusalem Districts  
- A 39 Village Survey.
- b) Accuracy of UNRWA Refugee Statistics  
- Extracts from UNRWA Reports.
-

III (a) Ramallah-Jerusalem village survey undertaken for UNRWA by Antranik Bakerjan (Ramallah area officer) to assess the impact of the June 1967 hostilities - June/July 1967 (on his own initiative).

Source - Antranik Bakerjan file, UNRWA, Ramallah

N.B. 'outside' = outside Jordan (included in pre-war village populations). left = fled.

Abu Qash

Prewar pop. 700, all remained. One house burnt because of war action. 5 families reported in immediate need - lists will be provided.

Abu Shukheidem

Prewar pop. 600-200 left - War did not touch village - Red Crescent Society have assisted 150 persons in village.

Abwein

Prewar pop. 1500 - some left - 300 villagers understood to be working outside - olives and olive oil main sources of livelihood - 100 reported in immediate need.

Ain Arik

Prewar pop. 1300. Approximately 150 people fled - some 1000 stayed - war did not touch village. 3 searches of village were made and considerable looting of houses and shops has been reported. Is said that village was stopping point for people evicted from Imwas, Beit Nuba, Yalu - this caused considerable damage to the groves of the village. Estimated 30 people from the village are employed outside.

Atara

Prewar pop. 1500 - 200 left, 1300 stayed - 30 villagers reported employed outside - village not touched by war - equivalent of 62 rations given to village council to be distributed to most needy.

Beit Duqqu

Prewar pop. 750. 450 stayed - 300 fled - War did not touch village - searches for arms made - no looting of houses or shops reported - 50 villagers employed outside - Livelihood depends mainly on grapes and plums - on whole village can manage self for 3-4 months. Immediate assistance given to 10 families.

Beit Illu

Prewar pop. 950 - 250 fled, 700 stayed - village searched - 1 house demolished - 85 villagers reported to be outside in employment. Most other employables worked in area's stone quarries - 26 families (88 persons) reported in immediate need -  $\frac{1}{2}$  rations issued to them.

Beitin

Prewar pop. 1200 - 250 left, 950 remained - 200 in Americas and support their families - War did not touch village. Many of its houses which were occupied by Arab Army personnel stationed in vicinity now used by I.D.F. (Tzahal). These houses reported to have suffered considerable internal damage.

Beitounia

Prewar pop. 2500 - very few left - 1 house demolished - reported that there are 1,000 who live, work abroad and send money to relatives - some 120 persons reported in extreme need - 125 rations extended to Mayor.

Beit 'Ur Fauqa

Prewar pop. 700-250 left and 450 remained - 37 villagers reported to work outside - War did not touch village - though all vacated for several days and returned. But no looting reported. Fruits and olives main source of livelihood - 53 families (140 persons) reported in immediate need -  $\frac{1}{2}$  rations issued.

Beit 'Ur Tahta

Prewar pop. 1400. 1050 remained - was fighting in and around village and one woman killed. Whole population fled for safety with exception of some elderly people who stayed behind. No houses demolished. Villagers who fled returned after 4 days. Village was searched, considerable looting has been reported. Livelihood dependent mainly on agriculture. General need - 95  $\frac{1}{2}$  rations given to most needy.

Bi'lin

Prewar pop. 600. 103 persons reported needy.  $\frac{1}{2}$  rations issued.

Bir Nabala

Prewar pop. 1000 - 700 remained - War did not touch village - searches were made, no looting reported. Livelihood of village derived mainly from immigrants outside, particularly in the Americas. General condition of village appears satisfactory, 100 persons reported in immediate need, names will be provided.

Bir Zeit

Pre-war pop. 2200 excluding the refugees. 800 reported to be outside - some shooting during war - but neither village houses nor villagers injured - need for immediate assistance - equivalent of 125 rations issued to Mayor.

Burqa

Prewar pop. 850 - 100 left, 15 employed outside - war did not touch village - olives and olive oil main source of livelihood - no immediate assistance reported.

Deir 'Ammar Village

Prewar pop. 970 - 400 left, 570 stayed. Main livelihood of village dependent on agriculture and products damaged - 38 families (81 persons) issued  $\frac{1}{2}$  rations.

Deir Ejreer

Prewar pop. 1965 - 496 left, 123 employed outside. War did not touch village - some need for immediate assistance exists which is under examination.

Deir Abu Mash'al

Prewar pop. 1100, 950 remained, 150 fled - War did not touch village, villagers gave up whatever arms they had - no searches and no looting - main livelihood of village derived from olive groves - 40 working outside. General need because of economic circumstances.

Deir Ibza'

Prewar pop. 700. 100 fled, 600 remained. War did not touch village. Little looting - a search was carried out. It is reported that some 40 villagers are employed outside. Livelihood mainly depends on olive trees - general need - 24 families (100 persons) most needy promised  $\frac{1}{2}$  rations.

Deir Qaddis

Prewar pop. 1100. 500 left - 600 stayed - much firing directed at village during war because of existence of military post (in village). Fortunately no direct hits on village itself - had to be evacuated for 3 days for safety of population - 30-40 reported working outside. Livelihood derived mainly from agriculture, olive trees. 101 (persons) reported extremely needy -  $\frac{1}{2}$  rations issued.

Dura El Qare'

Prewar pop. 700. 100 left - 70 are immigrants in States supporting their families. Main employment of people was in stone-crushing. Some need for immediate assistance found to exist. 70 rations issued for assistance.

El Jeeb

Prewar pop. 1200 - 1000 remained, 200 left, mostly for their employment outside. War did not touch village - said that 1 stray shell hit a house and 1 man was killed - 3 searches of village made and 1 shop looted. Livelihood of village dependent mainly on employment as stone-dressers and construction workers - 25% pop. dependent on agriculture - village has enough means to provide for pop. for a month - some 100 persons reported extremely needy - aid promised.

Im Safa

Prewar pop. 300 - 280 stayed - no damage reported - 10 families (30 persons) issued  $\frac{1}{2}$  rations.

Jammala

Prewar pop. 450. 50 fled, 400 stayed - main livelihood of village is agriculture - products were damaged - 23 families (44 persons) issued  $\frac{1}{2}$  rations.

Janiya

All roads to village passable only with difficulty - prewar pop. 550 - some 250 fled because of poverty, 300 remained. War did not touch village. Was searched - no looting reported - Livelihood dependent on olive trees and casual employment - 100 persons of the most needy assisted with  $\frac{1}{2}$  rations.

Jeebya

Prewar pop. 100 - all remained - war did not touch village - no need for immediate assistance.

Jifna

Prewar pop. 850 - 50 left, 300 reported to be working outside. War did not touch village - need for immediate assistance - equivalent of 60 rations allocated to village poor.

Judeira

Prewar pop. 450 - all stayed - no villagers reported working outside - most employed as stone dressers. War did not touch village - arms available handed over - Village can provide for its pop. for 2-3 months. Some 20 families reported in extreme need - further verification needed.

Kherbeth Abu Falah

Prewar pop. 1400. All people stayed. War did not touch village. No searches and no looting - main livelihood derived from agriculture - general need because of economic circumstances - 140  $\frac{1}{2}$  rations promised to most needy.

Kharbata

Prewar pop. 1100 - some 600 left - 500 stayed behind - 110 villagers reported to be working outside. Villagers had to vacate for 1st 2 days of war because of danger of fighting in area - no looting reported and no damage to houses because of war - Village has enough to live on for next 1-2 months - no immediate need for assistance.

Kufr Ni'meh

Prewar pop. 1200. All stayed with exception of a few married women who escaped to join husbands working in the East Bank. War did not touch village. No searches were made and no looting reported. Livelihood of village depended on olive trees - reported that 10 villagers employed outside - general need - 200  $\frac{1}{2}$  rations issued.

Nabi Saleh

Prewar pop. 350 - 100 left, 250 remained - war did not touch village - 15 villagers reported to be working outside. No immediate need for assistance.

Ni'lin

Prewar pop. 3,500 - now approx. 1500-2000 left - all villagers had to flee for 1st 2-3 days war because of danger - no damage to houses by war action reported - was some looting of valuables from village houses - village school badly ransacked - livelihood of village depended on olive trees and cactus. 20 persons reported to be working outside. Considerable need because of present economic circumstances. 300  $\frac{1}{2}$  rations promised.

Rammoun

Prewar pop. 1700 - none left - 6 villagers because of war action - many who escaped from Ramallah district passed through here - No looting reported - main livelihood agriculture and money from abroad. All harvest burned because of war actions - need exists - 150 rations issued to village council.

Ras Karkar

Prewar pop. 725 - some 300 left, 425 stayed - war did not touch village - search was made, 2 houses looted - 25 villagers reported to be working outside. General need - 100 of most needy assisted with  $\frac{1}{2}$  rations.

Shabtin

Prewar pop. 370. 120 left, 250 remained. War did not touch village. Village was searched, no looting reported. Livelihood depended on olives and some vegetables, mainly tomatoes and potatoes. Is a very abundant supply of water in village and their condition does not appear to merit any immediate assistance.

Shuqba

Prewar pop. 1700 - some 800 reported to have fled - present pop. 900 - 200 of villagers reported to be working outside, mostly in Kuwait. War did not touch village and no looting reported. Was very substantial number of livestock around the village. General situation of village does not appear to merit immediate assistance.

Surda

Prewar pop. 650 - none left - 35 reported employed outside - most employables are labourers - village not touched by war - some need for immediate assistance reported.

Taibeh

Prewar pop. 1700 - 500 left. One house hit by war action, no injuries reported. Similarly, no looting - village again on road to Jericho and therefore the stopping point for all escapees - groves of the village and its field products are reported to have suffered considerably from the fleeing people. Village maintains there is considerable need for assistance - further examination needed.

Turmos Ayya

Prewar pop. 1500 - 100 left, 1400 stayed - 1 person killed during war, no looting reported.

III (b)

UNRWA comments on the accuracy of Agency statistics and on attempts at rectification 1961-1969.

Extracts from Annual Reports of the Commissioner General of UNRWA.

1. Report for 1 July 1960-30 June 1961 General Assembly

Official Records : 16th Session Supplement No. 14 (A/4861)

Paragraph 41 - "Present registration statistics are subject to three major sources of inaccuracy : a) a backlog of false registrations which occurred with the initial inscription of refugees and which have not been eliminated in spite of repeated efforts by the Agency; b) a substantial accumulation of unreported deaths of the past eleven years; and c) persons who should be eliminated from the ration rolls on grounds of income. On present indications it is not possible to provide any dependable estimate for the categories (a) and (c). Without a general investigation into the individual circumstances of at least a large sample of the refugee community any figure for these categories could only be conjectural. The Agency has of course attempted to undertake such an investigation on several occasions in the past but has been forced to desist because hostile reactions among the refugees or untoward developments on the political plane caused the governmental authorities concerned to decide that the time was not opportune. However, it is possible to give a rough indication of the magnitude of the inaccuracy arising from unreported deaths (category (b) above). During the past

eleven years the average rate of deaths reported to the Agency has been 5 per thousand among ration recipients, their babies and children. Whatever improvement may have been brought about in the health conditions of the refugees -- the above figure is obviously unrealistic and indicates that at least 100,000 dead persons must now figure on the Agency's rolls (although it should be recognized that some of the families concerned contain entitled persons, especially children, not presently receiving rations)".

2. Report for 1 July 1965 - 30 June 1966 General Assembly Official Records : 21st Session Supplement No. 13 (A/6313)

Paragraph 22 - "In Jordan no systematic reverification (of ration rolls) has been possible since 1953 when disorders in the refugee camps caused the Government to call a halt to UNRWA's efforts to carry out a general scrutiny of ration entitlements. Subsequent attempts to deal with particular elements of the problem, such as the activities of the so-called merchants, who traffic in ration cards and rationed commodities and who have a vested interest in the existing inaccuracies in the rolls have also often failed, owing to adverse reactions among the refugees. However, towards the end of the period covered by this report the Government and the Agency were able to agree in pursuance of resolution 2052 (XX), on joint measures to verify (a) the continued presence in Jordan of persons suspected of having left the country and (b) the continued existence and presence of all families registered for rations. But shortly before the submission of this report the implementation of these

measures was temporarily deferred, at the Government's request.

3. Report for 1 July 1967 - 30 June 1968 General Assembly Official Records : 23rd Session Supplement No. 13 (A/7213)

Paragraph 9 - "In Jordan there were some 724,000 refugees registered with UNRWA before the hostilities, including persons who were temporarily resident outside the Agency's area of operations. After the exodus to east Jordan, the number of registered refugees still residing on the West Bank is estimated by the Agency at about 245, 000 and the number in east Jordan at about 455,500, plus some 38,500 registered refugees from Gaza who have entered east Jordan since the hostilities. However, the total figure of 494,000 refugees will include some unreported deaths and absences.

Paragraph 10 - At the time of writing this report the situation in east Jordan is still confused as a result of the movements of population that have continued throughout the year and the difficulty of obtaining accurate figures. In addition to the 494,000 registered refugees shown in UNRWA records as now located in east Jordan, the Government of Jordan has registered some 237,500 displaced persons from the West Bank plus about 8,500 displaced persons from Gaza, a total of 246,000 displaced persons - which, when added to the 494,000 UNRWA registered refugees would bring the total number of refugees and displaced persons living in east Jordan to 740,000 - However, there is, doubtless, some duplication between the UNRWA registrations and those of

the Government as well as within each group, and efforts are now under way to identify and eliminate these extra registrations --".

4. Report for 1 July 1968 - 30 June 1969 General Assembly Official Records : 24th Session Supplement No.14 (A/7614)

Paragraph 43 - Eligibility and Registration - "In east Jordan, Gaza and the West Bank the Agency's main effort was directed to restoring order in registration records, which had been thrown into confusion by the mass movements of population which followed the 1967 hostilities. Correlation of records of rations distributed in these three areas revealed many discrepancies, such as duplicate issue of rations and failures by whole families to collect rations, and these had to be investigated with the families concerned. To facilitate and speed-up corrections of the records, the refugees in Gaza and the West Bank were invited to declare the names of any previously unreported dead, absentees and other ineligible persons recorded on the registration cards and to nominate eligible children to receive any rations which became available as a result. The co-operation -- was most encouraging, and from the rations saved as a result of these voluntary declarations and other corrective action the Agency has been able, since July 1967 to issue 22151 rations on the West Bank and 13403 rations in Gaza to children registered with the Agency --"

Note - No mention of such corrective action in east Jordan.

**REMARKS:** 1. Shelter to shelter surveys were completed in J/HusseIn, ANC, IrbId, and Husson camps during the quarter. Similar surveys in the other six camps were completed earlier in the year.

2. The total camp population is lower than that of the previous quarter by 3702 families, 18,259 persons.

3. Appropriate Modification actions in respect to the Refugee camp inhabitants are being processed to reflect the true situation as revealed by the surveys.

- IV c) War of Attrition : Jordan Army G.H.Q.  
record of incidents in the Ghor as Safi  
region (South Dead Sea), January 1970.

See figure 26 for locations

3-1-1970 Two hours artillery shelling of Ghor as Safi area.

5-1-1970 Artillery shelling of Ghor as Safi - fires in the crops.

8-1-1970 Artillery shelling of Ghor as Safi - crops destroyed.

9-1-1970 Artillery shelling of Fifi village 1 civilian wounded and crops destroyed. Shelling all day.

10-1-1970 Artillery shelling of area to west of Ghor as Safi (abutting the border with Israel - Al Basatin). Crops destroyed.

14-1-1970 a) Artillery attack on Fifi  
b) Air raids on Fifi  
c) Artillery attack on Safi village and on police post.

15-1-1970 Artillery attack on Safi - fires in the crops and 60 camels killed.

16-1-1970 Artillery attack on Al Basatin.

17-1-1970 Artillery shelling of Safi and police post. Crops destroyed.

19-1-1970 Artillery shelling of Safi and Fifi. Fires in the crops.

20-1-1970 a) Artillery attack and air raids on Ghor as Safi area. Car destroyed and driver killed.  
b) 1900 hours - 2300 hours. Enemy forces (armoured vehicles) crossed cease fire line after artillery shelling - entered Safi village.

21-1-1970 Orders given to Jordan units to oblige enemy to withdraw from Safi. Battle started 0335 hours and continued to 0730 hours. Enemy compelled to withdraw. 2 killed in operation, 9 injured.

24-1-1970 Air raids on Ghor as Safi area. Rockets and napalm used. 9 civilians injured and crops destroyed. 1 Israeli aircraft shot down.

25-1-1970 Artillery firing on Safi area (Wadi el Hasa)

26-1-1970 Artillery firing on Ghor as Safi.

- 27-1-1970                    Artillery firing - crop destruction.
- 28-1-1970                    Machine gun firing on civilian vehicle  
in Wadi Khanzira.  
(c.20 km south of Ghor as Safi).  
Car destroyed.
- 29-1-1970                    Artillery firing on police post.

Shelter Number

Sex

Position in June 1967  
household

Date of Interview

Name of Interviewer

Name of Supervisor

Concerning Head of Household, June 1967

## (1) Sex of household head

	%
Male	74.8
Female	25.2

## (2) Age of household head in June 1967

Mean	39.8
Ranging from Normal Distribution	14.0 to 78.0

## (3) Number of family members in June 1967

Mean	6.16
Ranging from Normal Distribution	1 to 14

## Number of family members contributing to family income

	%
0	9.2
1	82.2
2	7.4
3	1.2

## Number of family members contributing to family income from outside the West Bank

0	84.7
1	14.1
2	0.6
3	0.6

## (4) Household head - level of education in June 1967

	%
Elementary	23.9
Secondary	5.5
Tertiary (not University)	0.0
University	0.0
Without formal education	70.6

## (5) Exact employment on West Bank in June 1967 - head of household

## Categories based on 1961 Jordan Census

Professional, technical	4.3 (all military)
Administrative, managerial	1.2
Clerical	0.6
Sales	1.8
Farmers, fishermen, hunters, related	32.5

Miners, quarrymen, related	0.6
Transport	1.8
Craftsmen, production process workers miscellaneous labourers	44.2
Service, sport, recreation workers	0.6
Other (unemployed, students)	12.2

Did you work with a firm with branches on both Banks?

	%	
Yes	0.6	Potential 'pulling' factor
No	99.4	

Were you employed by the Government?

	%	
Yes	4.9	Potential 'pulling' factor
No	95.1	

(6) Place of Residence on 1 June 1967

Name of town/village  
Region (figure 12 )

	%
Nablus	22.1
Ramallah	11.7
Jerusalem/Bethlehem	21.5
Hebron	13.4
West Jordan Valley	31.3

(16) What were the major reasons compelling you to move to the East Bank?

A P P E N D I X VI

Israel: Ministerial Initiatives regarding Settlement Policy in the Occupied Territories.

- a) The July 1967 Allon Plan (territorial and settlement aspects)
- b) The July 1973 Dayan Document
- c) The August 1973 Galili Document

VI (a) "The chief sections and principles of the 'Allon Plan' as it was outlined behind closed doors, in support of the laying of the Plan on the Cabinet table (26 July 1967)".

(Source - Cohen Y. Tokhnit Allon Pp.171-173.  
Translation by W. W. Harris)

- A. I propose that Israel stand on the position that her eastern border needs to be the Jordan River and a line bisecting the Dead Sea at its mid-point for its whole length, and that the mandatory border in the Arava will remain as it was before the Six Day War.
- B. In order to set-up a firm defence alignment on the one hand, and to establish and assure the integrity of the land from the geostrategic point of view on the other, it is incumbent upon us to joint the following areas to the state, as an inseparable part of its sovereign territory:
- 1) A strip with a breadth varying between 10 and 15 kilometres (approximately) the length of the Jordan River, from the Beit Shean Valley to the north Dead Sea, containing a minimum of Arab population.
  - 2) A strip with a breadth of several kilometres (the exact dimensions need to be inspected in the area) north of the Jerusalem-Dead Sea axis, which will join somewhere with the area north of the Atarot-Beit Horon-Latrun road, enlarging the Latrun region.
  - 3) With regard to Mount Hebron and the Judean Wilderness there are two possibilities to be considered: incorporating Mount Hebron with its population or, at least, the Judean Wilderness from the eastern approaches of Hebron to the Dead Sea and the Negev.
  - 4) In order to prevent the inclusion of a large Arab population it is necessary to consider the possibility of being satisfied with incorporating only the Judean Wilderness with, in addition, smaller border adjustments as at Gush Etzion and in the south of Mount Hebron.
- C. In the areas I have drawn attention to above, there is a need in the near future to erect rural and urban settlement outposts and permanent military bases according to security requirements.

- D. There is a need to establish housing estates populated by Jews in East Jerusalem over and above the rapid reconstruction and populating of the Jewish Quarter in the Old City.
- E. It is incumbent upon us to initiate links with the leaders and people of the West Bank in order to judge their readiness (and to encourage them) to establish an autonomous framework in the areas which will not be under Israeli sovereignty. The autonomous framework will include an association with Israel. Such a link will be expressed in the creation of a co-operative economic framework, a defence pact, technical and scientific co-operation, cultural agreements and the finding of a co-operative solution to the settlement of Gaza refugees on the West Bank.
- F. It is clear that it will be incumbent on the Government to prepare on its own initiative a general (comprehensive and long-range) plan for solving the refugee problem - a painful problem and only capable of full solution on the basis of co-operative regional action with international support. Until the attaining of such combined action the Government of Israel must begin to erect a number of model refugee settlements on the West Bank and perhaps also in Sinai. This thing is necessary for two reasons : to learn from experiment and to demonstrate good intentions, as well as to express our readiness to push for a constructive solution of the problem. It is necessary both from the humanitarian and political viewpoints.
- G. Israel must attach the Gaza Strip to itself, with the original inhabitants (those who were there before 1948). As regards the refugees who will not be absorbed in the Gaza Strip due to economic, social and other considerations - in my opinion, as I have said, they should be settled on the West Bank or in the El Arish region, according to their choice. The United Nations must continue to look after the refugees whereas Israel will take full responsibility for the care of the permanent population. Of course the execution of such a plan will take time and so, in the interval, the Gaza Strip will not be formally joined to the state.
- H. The determination of the exact border lines will of course only be made after hearing the opinion of the Chief of Staff.
- I. Likewise it is in my view necessary to create, in the near future, a supreme authority for dealing with the problems of the occupied territories and of the refugees - within the frame of the Prime Minister's Department.

VI bTHE DAYAN DOCUMENT

(Source - Ha-aretz 17-8-73 P.14 Translation by  
W.W. Harris)

1. Refugees - Additional budget for existing camps.  
Gaza - 100 million lirot a year.  
Judea and Samaria : 50 million lirot for five years.
2. Development - Gaza and Judea/Samaria.  
200 million lirot a year. In total (with the treatment of the refugee problem) an additional budget of 300 million a year with a further 50 million lirot on one occasion.
3. Urban and Industrial Centres
  - a) Jerusalem : Extension of urban population and industry south, north and east, across the green line.
  - b) Yamit : Planning and development of Yamit at an accelerated pace, as a regional and urban centre for the Rafiah approaches. Establishment of a deep-water port south of Gaza - without being conditional on the development of the Haifa and Ashdod ports.
  - d) ((c) lacks a source) Qiryat Arba' : Continuation at an accelerated rate of industrial and population development.
  - e) Nabi Samuel : Establishment of an urban settlement at Nabi Samuel.
  - f) Qalqilia - Tulkarm region : Establishment of an industrial area in Kfar Saba on Jewish absentee lands (about 1200 dunams) and opening the possibility for Jewish initiatives to erect industrial and housing projects, in a planned and controlled fashion, in the Qalqilia and

Tulkarm regions.

g) Golan Heights : Establishment of an urban-industrial centre on the Golan Heights.

4. Settlement - Founding of additional settlements as proposed by the Settlement Department, and assuring the required budget for the development of existing settlement.
5. Encouragement for the erection of industrial enterprises in the territories - as proposed in S. Gazit's letter.
6. Priorities - Priority for the territories will be examined, with the aim of strengthening urban population, village settlement and establishment of industrial enterprises in them.
7. Acquisition of Lands :
  - a) The Israel Lands Authority will act to acquire lands in the territories with the aim of making them available for the settlement system, public and private enterprises and land exchanges.
  - b) The acquisition of lands and ownership by companies and individuals will be to some extent allowed and will be done for constructive needs and within the political and security conception.
8. Employment of residents of the territories in Israel - will be controlled and inspected and the requisite measures will be taken to ensure that working conditions and wages are at the accepted Israeli levels.

9. Links with Jordan - Encouragement and strengthening of the affinity and the links between the residents of the territories and the Kingdom of Jordan.
10. Advancement of local employees - as far as possible administrative functions will be transferred - including senior functions in the government service (in civilian spheres) - to local Arabs.

VI cTHE GALILI DOCUMENT(Source - Jerusalem Post 17-8-73)Preamble

- 1) These summaries will be reflected in the Alignment election platform and be included in the overall working programme of the (next) government ---
  - 2) After the main points of the working programme have been approved, the operational plans will be worked out in detail. The operational budgets will be incorporated in the annual governmental budgets.
  - 3) The working programme for the territories in the next four years does not involve any change in their political standing, nor in the status of their inhabitants and refugees. UNRWA will continue with its operations.
- A. Principle : The next government will continue to operate in the territories on the basis of policies adopted by the present Government.
- B. The Gaza Strip - Refugee Rehabilitation and Economic Development. It is our intention to outline a working programme for the next four years and to allocate the required finances for its operation with the aim of achieving the rehabilitation of refugees and economic development. The main points of the working programme : rehousing (new housing for refugees near the camps and rehabilitation of the camps), vocational training schemes, improved educational and health services,

creation of jobs for artisans and in industry, encouragement of the inhabitant's own initiative to raise their living standards (c.f. sections 1, 2 in Dayan Document).

- C. Development of Judea and Samaria. It is our intention to draw up a working programme for the next four years and ensure the necessary funds for its operation with the purpose of achieving the development of the economic infrastructure and to improve essential services (that is, building hospitals, regional and village clinics, expansion of water services, more vocational and post-elementary schools, a better electricity system, improving the road network, development of artisanry and industry as a source of livelihood for local residents, better housing for refugees, and help to local authorities. )
- D. Financing for Judea and Samaria. In accordance with the arrangement between the Ministries of Finance and Defence.
- E. International financing. Efforts will be made to obtain the necessary means from foreign sources for financing the refugee rehabilitation programme and development plans.
- F. Encouraging Israel businessmen in the territories. All kinds of encouragements (tax relief, government loans and so forth) will be accorded to Israel businessmen in setting up industrial plants in the territories at the same rates accorded to investors in those areas given

priority in Israel (c.f. section 5, Dayan Document).

- G. Encouraging local residents own initiative in Judea and Samaria. Extending aid to self-initiative of the local population in the fields of education, culture, religion, services, and in cultivating democratic patterns in social and municipal life. Senior civilian posts in the military government will be filled, whenever possible, by local inhabitants (c.f. section 10, Dayan Document).
- H. The Open Bridges Policy. This policy will continue as heretofore (c.f. section 9, Dayan Document).
- I. Work of Inhabitants of the Territories in Israel. Work of inhabitants of the territories in Israel will continue to be supervised and they will be ensured the same wages and working conditions as prevail in Israel (c.f. section 8, Dayan Document).
- J. Outposts and Settlements. New settlements will arise and the network of outposts will be strengthened. Efforts will be made to increase the population by developing industry and tourism.

When Government budgets come to be determined, the necessary means will be allocated each year in keeping with the recommendations of the Settlement Department (Jewish Agency), and with the approval of the Ministerial Settlement Committee, with the view of setting up in the coming four years additional settlements in the Rafiah approach, the Jordan Rift and on Golan Heights. (see figure 38. ).

They will include : an industrial centre on the

Golan Heights; a regional centre in the Jordan Rift; development of the north-east shore of Lake Kinneret and the north-west shore of the Dead Sea; operation of planned water schemes.

The development of the settlements in the territories will also involve non-government elements, both public and private, within the approved framework (c.f. section 4, Dayan Document).

K. The Regional Centre in the Rafiah Approach. The continued development of the regional centre of the Rafiah approach will be ensured and it will be expanded to 800 housing units by 1977-78. Encouragement will be extended to industrial development for those persons with private means wishing to settle there (c.f. section 3b. Dayan Document).

L. Concentration and Purchase of Land in the Territories.

1) Intensified concentration of land for existing and envisaged settlements.

2) The Israel Lands Authority will step in to acquire land and real estate in the territories for purposes of settlement, development and land exchanges.

3) The Lands Authority will lease land to companies and private persons for the purpose of approved development programmes.

4) The Lands Authority will acquire land by every effective means, including through companies and individuals who will buy land in coordination with the authority.

5) Acquisition of land and real estate by companies and private persons will be approved only in those cases where the Lands Authority is unable or not interested in such purchases.

6) A special Cabinet Committee will be empowered to grant permits on condition that the purchases are transacted for the purpose of constructive projects and not for speculative purposes, and within the framework of government policy.

7) The Lands Authority will also acquire land already bought by Jews.

(c.f. section 7, Dayan Document).

M. Jerusalem and Environs. The population and industrial development of the Capital and its environs will continue with the aim of consolidation beyond the original area mentioned in Administrative Order No. 1 (annexing East Jerusalem). To this end efforts will be made to buy land and government lands will be utilized within this framework, to the south and east of Jerusalem that the government has decided on enclosure.

(c.f. section 3a, Dayan Document).

N. Nabi Samuel. It is resolved to implement the government decision for the settlement of Nabi Samuel.

(c.f. section 3e, Dayan Document).

O. Deep Sea Port south of Gaza. With the intention of expediting the development of the Rafiah approach, it is resolved that within the coming two-three years there will be a thorough analysis of the basic elements of the proposal to establish a deep sea port

to the south of Gaza. This will include physical conditions, the economic viability of such a scheme and the political ramifications. After all the data has been compiled and a concrete blueprint submitted, the government will decide on the matter.

(c.f. section 3b, Dayan Document).

- P. Kfar Saba Industrial Zone. All necessary conditions will be provided for setting up an industrial zone for Kfar Saba beyond the Green Line, as well as the development of Israel industries in the Qalqilia and Tulkarm areas.

(c.f. section 3e, Dayan Document).

Mr. Yigal Allon on Settlement Policy :  
Responses to questions posed by the author  
(W.W.Harris), March 1978. Transcription  
of tape recording.

---

(Yigal Allon, Deputy Prime Minister of  
Israel 1968 - 1977, was the chief architect  
of the Labour Government's overall settlement  
programme in the occupied territories and  
served as first Chairman of the Inter-  
Ministerial Settlement Committee).

---

1. Q. When were your ideas concerning the Golan Heights first submitted to the Government?

A. My ideas as to settling the Golan Heights were submitted to the Government a few weeks after the official Allon Plan was presented to the Cabinet (July 26, 1967). In fact before submitting it to the Government formally I had a number of talks about it with the late Prime Minister Mr. Levi Eshkol and he was convinced that our control of the Golan Heights was vitally important strategically.

2. Q. How powerful was the influence of the July 1967 Kibbutz Golan group in causing a Government decision to approve settlement in the Golan?

A. The group which founded subsequently Kibbutz Golan (the official name was Kibbutz Ramat ha Golan) was next to none - it was a small number of young men and women from various Kibbutzim - highly idealistic, deeply motivated by the necessity to turn the Golan Heights from a source of danger into a source of life. They volunteered immediately after the Six Day War to carry out certain works which could be done by civilians rather than by soldiers and they were employed by the Army to collect deserted animals - cows, horses and so on. I on my part helped them officially to finance their wages through the fund which was at my disposal for the unemployed (as Minister of Labour) and after getting the approval of the Prime Minister I also asked the Department of Land Settlement of the Zionist Movement to help them until a final decision was taken by the Cabinet and once this was achieved they were recognised as potential settlers - at the beginning as an experimental venture and gradually

it has developed into a full-fledged kibbutz which is rather successful economically and socially.

3. Q. What was your own position with regard to early settlement in the Golan?

A. The Golan Heights were so important, so indispensable - therefore I not only recommended establishing settlements from immediately after the Six Day War but in fact I helped to establish them

4. Q. How did the Yom Kippur War influence Government thinking concerning the role and future of Golan settlement policy, including the geographical distribution of settlements within the area? Could you sketch the phases in the development and application of the idea of industrially-based settlements in parts of the Golan and Judea-Samaria.

A. Since the Yom Kippur War came to Israel as a surprise not only the army found itself in great difficulties but these few small settlements were not yet prepared enough by means of fortifications and anti-tank weapons and so on - and shelters. They were evacuated against their protest. They wanted to stay with the army. They were ready to evacuate only mothers and children and babies but they felt that the adults should remain and defend their settlements alongside the army. The lesson that we learned from that surprise was - and still is - that every single settlement should be fortified as if it were a military fortress. The settlers should be well organized and well trained and well equipped with modern and sophisticated means of self-defence against ground

forces. And today I can say that each individual settlement and all of them together are fortified and equipped to such an extent that they will play a role not only in day to day security needs but also in case of an all-out war.

The idea of industrially based settlement on the Golan and in parts of the Judea Samaria area, alongside the Rafiah, is that it is not enough to establish small (by nature small) settlements based mostly on agriculture --- which can help us of course to locate the right settlements at the right strategic points or areas - if we are also to have a large population in these areas industrially based townlets are needed - and this encouraged us to establish one on the Golan (Qatzrin), two in Samaria and Judea, or rather very close to the Valley and the Judean desert (one is Ma'ale Efraim which is within the belt of the Allon Plan and also Ma'ale Adumim, on the main axis between the Dead Sea and Jerusalem, which is also part of my plan) I think that this is still one of the major means to attract greater masses to settle down in these vital areas. They will earn their living from industry as well as services for the scattered agricultural settlements.

5. Q. When was the idea of an Arab Ramallah-Jericho corridor incorporated into your plan?

A. When I proposed my plan in July 1967 I didn't yet think in terms of a corridor between the two Banks via Jericho and Ramallah. But a couple of months after I proposed my plan, when I studied it again, I reached the conclusion that it would be wrong not to provide those

two inter-connected territories (the East Bank and the West Bank) with an Arab controlled and even sovereign access or corridor. I found that this access (Ramallah-Jericho) was the correct geographic and strategic place.

6. Q. When did you decide to exclude the populated areas of the Hebron district from the plan?

A. I (for myself) excluded the population of Hebron rather early - weeks after July 1967 and I made it clear in my oral remarks at Cabinet sessions as well as in my talks with the Prime Minister, fellow Ministers and Members of the Knesset.

7. Q. Why did settlement in the Jordan Rift start very slowly compared to the early and rapid activity on the Golan? What was the influence on Rift Settlement policy of the War of Attrition and of the Jordanian Civil War?

A. It is hard to explain why we were a little late in establishing the first settlements in the Jordan Valley although I thought and I still think that this Rift should enjoy the top priority in our land settlement policy along the strategic boundaries. Partly there were disputes among ourselves and partly because it took a little time to prepare the ground for settlement - but the first two or three settlements started as early as the others - much earlier than in the Rafiah area - a little later than the Golan Heights.

The War of Attrition from Jordan against Israel only encouraged us to establish these settlements and the Jordanian Civil War had nothing to do with it - in my heart I was of course on the side of the legal govern-

ment of Jordan because I felt that the PLO in Jordan wanted not only to overthrow a regime but to establish such a regime as would be utterly against Israel - would create greater difficulties than the existing regime which for many years was not as friendly as people think. Nevertheless that was the choice of the least evil.

8. Q. What relationships do the western frontier adjustments proposed in your plan (Latrun - Beit Horon, etc.) have to the idea of a Jordan Rift strategic strip?

A. My idea about including the Latrun-Beit Horon axis with the Israeli controlled area is mentioned rather early in the original memo which I tabled with the Cabinet. I felt that that was vitally important to include the airstrip in Atarot as well as this important strategic road - and I don't see any problems with it. It's not so much of importance for the Jordan Rift as it is for a united Jerusalem and its outskirts.

9. Q. What was the procedure for authorizing settlements across the Green Line prior to the advent of the Inter-Ministerial Settlement Committee?

A. Before the special inter-ministerial committee for land settlement policy was established we had different forms in which we took decisions vis a vis settlements. Rather early we established a special committee headed by the Prime Minister Mr. Eshkol for the administered areas. For a while this committee was also discussing the problems of land settlement and the policy vis a vis government owned land in the administered areas and so on. But when things began to expand and the Prime Minister felt it

(land settlement) was too much to ask of this committee, which was preoccupied with the political aspects of the administered areas, we decided to establish a special committee which for the first few years was headed by me as its Chairman. In addition to this special inter-ministerial settlement committee we had two other committees which had to do with populating certain areas in the administered areas. One was the Supreme Inter-Ministerial Committee for Jerusalem of which I was the Chairman for a while and later on when I was rather too busy with a new Ministry at my hands the Minister of Justice Ya'cov Shimshon Shapira was appointed to this job. And for a few months we had an ad-hoc committee for Hebron which was headed by me as well - and therefore, because of the fact that one person was the Chairman of these three committees the co-ordination between the activities was more or less safe.

10. Q. When was the Inter-Ministerial Committee set up?

What were the reasons for this step?

A. I can't remember by heart when the committee was set up rather early, when Mr. Eshkol was still alive, and I don't think it is that important because whether a special committee or another committee decides about it any decision, according to our constitution of a sub-committee of the Cabinet, is considered as a decision by the plenary session of the Cabinet - because according to the rules of the Cabinet the minutes and the decisions of sub-committees are distributed amongst the other members of the Cabinet. They can read them and any single one

can ask for a review of a decision. Therefore if within two weeks there is no comment from any other Minister a decision which is taken or adopted by a sub-committee is considered to be a decision by the entire Cabinet.

11. Q. What was the procedure in the Committee's work under the Labour government?

A. We had in fact a wide committee composed of two major contingencies. One was the Ministers from the Cabinet itself and the other half the relevant members of the Zionist executive - and everyone had a vote and any decisions which were taken by this joint committee were on behalf of the two co-operating agencies - the Government on the one hand and the Zionist executive on the other (the Zionist executive is responsible for land settlement according to the convention which was signed between the Government and the Zionist movement many years ago when Mr. Ben Gurion was still in power).

The procedures were exactly as in other committees of the Cabinet. At least a few days before a session takes place the agenda and all relevant material should be provided to the members of the committee so they will have a chance to study the problem and make up their minds on their position. Then we used to also invite our advisors, particularly the experts on land settlement, Arab affairs, security affairs -- so every aspect of land settlement policy was discussed. Sometimes we used to go to the very area to see for ourselves with our own eyes and not only to trust experts. Sometimes we had to postpone a decision for another week or two in order to

give some of the members an opportunity to study the matters a little more deeply. Only then was there a vote - an ordinary majority would be enough, in certain cases we had unanimous decisions and in certain cases big majorities. Never was such a decision taken by a small formal majority. Even here if one member of the Committee opposed the decision (to the extent that he thought it would damage the country) he would have asked for an appeal to the entire Cabinet - there were some cases of this sort. Then there was a new discussion when we discussed it again at full length with the Cabinet, and the Cabinet decided about it.

The other procedure was that we had to report every decision of this kind to the Foreign Affairs and Security Committee of the Knesset. So sometimes we had a parallel debate. After doing the job with the Ministers we had to go again - sometimes - to the Committee of the Knesset. One has to remember that but for a short while when we had the National Government (I never thought it was the most effective one but nevertheless we had it) there was, as it should be in a parliamentary system, a Government and opposition. In the Committees of the Cabinet and the Zionist executive we didn't have the opposition represented, but we had them on the (Knesset) Committee. So some agreed - some disagreed.

A P P E N D I X VIII

Leidata shel Qeshet (The Birth  
of Qeshet)

---

An account by Mr. Yehuda Harel, resident of Merom Golan and leading figure in the Golan Settlement Committee, of events concerning Golan settlement, October 1973 - June 1974.

---

English Translation of Original Hebrew  
(by W. W. Harris)

I am writing these things from memory. Clearly it is necessary to do some work, inspect diaries and records, and consult comrades, but meantime from memory ---.

(i) The War and afterwards. Although the Golan settlements in general and Merom Golan in particular suffered considerable damage as a result of the war (the Merom Golan site was partially destroyed and the population uprooted) we returned home on the fourth day of the war with a feeling of determination and not with the feeling of weakness and failure which revealed itself in the state in the period after the war.

Even on the second day of the war we applied to appropriate factors in an attempt to convince them to conquer Bein Jinn in order to ensure that the Beit Jinn springs would be joined to Golan area and would assure water to the Heights. After the war we were anxious to install a pipeline from Beit Jinn : also during the war we set up a meeting with Yehial Admoni in the Merom Golan shelter and we agreed with him on a post-war work plan.

- a) Doubling of the Jewish population on the Golan within a year.
- b) Erection of a Golan City.
- c) Settlement of the Central Golan
- d) Building of an extensive defence system.

In the days after the war we succeeded in getting approval from Raful (Rafael Eitan) to begin working areas at Ain Havad, which is on the eastern side of the pre-war cease fire line. We were also anxious to excavate the Rouquad storage-pond - also partially in the "salient" area.

When Pinhas Sapir visited the Heights immediately

after the war we convinced him of the merits of our plan (all of it) and in particular of the necessity to begin constructing the Golan City. We were not alone in the feeling that the lessons of the war were that we should stand firm and not cave-in.

In those days I went with Musiq Garliq to a meeting of about twenty comrades at the home of Rabbi Haimqa Druqman. There I met Hanan (Porat) for the first time and others who were later to set up Gush Emunim. Even beforehand I felt a bond with Hanan and I wanted to get to know him as I believed that Kfar Etzion and Merom Golan opened a new period in the history of the State of Israel and even in the history of the people of Israel.

At this meeting, apparently the foundation meeting of the "Gush", there was a similar atmosphere to that evident on the Golan. We renewed the Golan Settlement Committee with the purpose of realizing the four points outlined above. We did effective work on the subjects of budgets, security and so on. The chief workers were Musiq (Ramat Magshamim), Avner (Snir), Doron (Eli'ad), Rafi (Ramot) and myself.

(ii) Change for consideration. In December 1973 we began to feel that we were at a turning point : disengagement negotiations in the south, the manoeuvrings of Kissinger, Abu Rudeis families being prevented from returning home, and the general atmosphere in the country - all these gave us to understand that the general tendency in the country was in the direction of capitulation.

In December I received information from a qualified

source in Tzahal and from Yisrael Galili that it was not certain that Israel could maintain the pre-war Golan border. We got in touch with Ramat Magshamim and set up a night session in Merom Golan at which we decided on intensive activities beginning the next day. Our objective was to retain the pre-war line. In the Winter months our activities reached a peak. I list in brief some of the things we did :

- a) Basic meetings with all Government Ministers.
- b) Meeting with the Ma'arakh faction in the Knesset.
- c) Two sessions with the Foreign Affairs and Security Committee of the Knesset.
- d) Raising the subject and achieving resolutions in Ha Kibbutz ha Meuhad, in the Ihud, and in Regional Councils.
- e) Information giving assemblies in settlements.
- f) Activity in the youth movements and a public youth meeting in the cinerama.
- g) Crystallization of urban activity.
- h) Multitude of publicity notices in the newspapers.
- i) An assembly of intellectuals in the Bnei Brit auditorium.
- j) A meeting with Golda in which she assured us that there would be no moving from the pre-war line.
- k) Several assemblies of Golan settlements.
- l) Two assemblies of all the settlements across the green line, the first in Kfar Etzion at our initiative and the second at Neot Golan.
- m) Meetings and convincing of key personalities.

Very many Merom Golan members took part in this activity and the whole settlement participated whole-heartedly.

Today we know for certain that our activity prevented

a deep withdrawal on the Golan and damage to settlements.

At the beginning of the Spring we came to understand that Quneitra would be the focus of the struggle. Accordingly we began work at full-speed to execute plans for land preparation in Quneitra. We obtained the requisite approval and began ourselves to clear the city of its houses and to prepare lands.

During the negotiations for a separation of forces on the Golan we began to consider what would be the situation if the Government did not hold firm and made concessions regarding Quneitra? ---

Then I thought - for the first time - of reacting by the speedy erection of a settlement either in Quneitra or nearby.

In those days I went round Quneitra many times with Shimshon to check out the works of demolition which we were executing there. We began to look for a suitable location for a settlement. Among the places we inspected were : the old temporary site of Meron Golan, the military police building in East Quneitra, the "front command," the "brigade building" and the hospital bunker.

(iii) The Decision The final period before the signing of the Disengagement Agreement was extremely difficult. We already felt (and also received information) that Quneitra would be handed-over to the Syrians. From the Chief of Staff we heard the "evaluation" that Quneitra is not important --- the war of attrition was at its peak and there were daily casualties. In the whole country there was a terrible

weariness and severe weakness (interestingly - in the whole country except for the Golan settlements).

In the settlement we spent much of the time sitting in the shelters with a feeling of extreme isolation. It was made clear to us that Ha Kibbutz ha Meuhad would not stand behind us in our struggle over Quneitra. On Saturday night (May 10) we held an assembly. The day after, Sunday, the Kibbutz ha Meuhad Secretariat had to meet in the Warsaw Ghetto Museum. Several Ramat Magshamim members also participated in our assembly. On the Friday before the assembly I was with Shimshon at Northern Command and we chatted with the officer in charge (Ya'anqle). We asked him what his opinion would be if we established a settlement in Quneitra within a week? He responded thus - "first you didn't ask and I don't know anything about the matter and second, if your settlers aren't there already it may be too late."

At the Merom Golan assembly the proposal that a group from various Golan villages should settle in Quneitra was raised, along with beginning work in Galilee settlements to get together a permanent nucleus for the new Kibbutz. Even before the assembly, a picked group agreed to take the matter upon itself. After midnight the assembly approved the proposal.

The Secretariat (Merom Golan) + some other members + some Ramat Magshamim members came together at 1.00 a.m. in our restaurant shelter to decide on the execution.

We made a "crazy" decision - to establish the settlement on Sunday morning i.e. eight hours after taking the decision! (certainly without precedent in the history of settlement). At 1.00 a.m. we began the work and got the

team together. We started on the preparation of a vehicle, tractors, a generator, tables, beds, mattresses, weapons and so on.

We decided on the hospital bunker as a location because in those days there was a situation of uninterrupted shelling.

In the morning I left for the Kibbutz ha Meuhad Secretariat meeting in the Warsaw Ghetto Museum (Acre) and announced there the establishment of a settlement in Quneitra - without knowing for certain that the settlement had actually gone up (apparently the same day we received "in secret" a generator from the Jewish Agency in Tzefat).

In one day, the bunker was cleaned, electricity installed, water brought in and work organized (on Merom Golan lands, in surveys, in preparing areas in Quneitra) - along with guard duty. In the evening Tzipqa went with the children to the settlers, taking wine and cakes. **THE SETTLEMENT WAS A FACT !** Many soldiers and officers visited the site and they were impressed --- In these first days I felt a great fear - I interpreted the erection of the settlement and its fulfilment as a thing of powerful significance and great value in the consciousness of the entire people. Such an enterprise should not be permitted to descend to the level of a mere political demonstration. If it became clear that our step was nothing more than a political demonstration it would cause irreparable damage to the whole idea and status of settlement in general and especially on the Golan. It is difficult to claim that we erected the new settlement after assuring the minimal conditions (at least 5 members on the site). Had I been

irresponsible?

(iv) First Days In the first days we devoted our entire effort to ensuring that we had the required number of people from Merom Golan, Ramat Magshamim and El Rom at the new settlement. Thereafter we began to visit Galilee settlements to try to get people for a permanent Kibbutz nucleus. The tour of Galilee settlements was a failure. We didn't get a single serious candidate --- Meanwhile Dafne agreed to pass out work from its footwear enterprise and the bunker began to take on the form of a settlement.

From the first day I pressed the bunker people to decide on a name for the settlement and on each occasion they assured me that the matter would be resolved, but the selection of a name was postponed from day to day. Finally, one day when I was sitting in the bunker with several of the members (already I don't remember who was there) I announced that we wouldn't stand up until we had chosen the name. One of the members suggested "Qashtit", based on the name "Quneitra" (Quneitra in Arabic = Qeshet in Hebrew - "arch"). I said that Qashtit didn't seem suitable to me and I proposed "Qeshet". My proposal was accepted.

The tales about "Quneitra Shelanu Tamid" (Quneitra will always be ours) were created later and don't have any foundation. In those days demonstrations were held in Jerusalem against Golan withdrawal. Here "Gush Emunim" began to crystallize. People began to come direct to Qeshet from demonstrations, equipped with haversacks, holy books for study --- Suddenly Qeshet began to take on the form of a religious settlement. Up to this time we had assumed that

Qeshet would be a Kibbutz ha Meuhad settlement.

One evening I came to the bunker and found religious members sitting and studying in every room. I interrupted Assaf and said to him : "Listen, if you don't restrict the flow from Jerusalem there will soon be no-one here who will work and the place will be converted into a Yeshiva." Assaf answered "What's with you : These members are the best workers. I wish more would come."

The next day Assaf had to go to meet with a particular Kibbutz ha Meuhad nucleus to convince them to come to Qeshet. That night we decided (it seems to me after a talk with Uri Meir) that if we also failed with this nucleus we would give the settlement over to the religious. The next day Hanan Porat came to see me and we sat and reviewed the matter all night. At the end of the discussion he took upon himself the responsibility of creating the nucleus for Qeshet. This rescued us from a terrible failure - a rescue for which I shall never forget Hanan and especially the people who came from Jerusalem and from other places and made Qeshet a settlement which one could be proud of.

In our meeting Hanan told me about Eli Sadan and asked me to travel with him and with Eli to Jerusalem for a meeting with Tzvi Yehuda Kook, because without the Rabbi's blessing Eli couldn't leave the Yeshiva. Of course I consented and went along.

I won't go into details here about our meeting with the Rabbi. It was clear to me that there was no necessity to convince the Rabbi - on the contrary it seemed that he was

trying to convince us. Since then I have met the Rabbi a number of times and have become acquainted with many of his students. But already at the first meeting I could distinguish his absolute self-confidence - free of any hesitation or doubt - confidence that small events and times (that to us seemed big and decisive) could not budge or even touch him.

The days in the bunker came back to me as the first days of the crystallization of the Qeshet nucleus. This period gave much to me. I always feel that the most important asset I can amass is getting to know people who strengthen my faith in man, and in this period I became acquainted with Hannah Tav, Rabbi Tzuqerman, Rabbi Aviner and Vardina Vali.

Above all I was impressed and influenced by the personality of Hannah Tav. I remember one day I was sitting in the eating room of the bunker and talking with Rabbi Tzuqerman, surrounded by a number of Qeshet members who were not taking a very active part in the conversation. I delicately raised the sensitive topic of what would happen when the disengagement agreement was signed and Quneitra handed over to the Syrians. I explained my view that we should struggle up to the last moment but should also start planning what would be done if we didn't succeed. I began to raise the notion of advance preparation and planning for a move to the Quneitra Valley or to the Central Golan in order to continue a struggle that would certainly go on for many more years. I felt that I had found a common language with Rabbi Tzuqerman and the discussion progressed to practicalities. During the discussion Hannah Tav stood at the sink and washed dishes. Suddenly Hannah left the sink and pressed toward the

table. She asked modestly if she could say something. In total silence Hannah said (I quote from memory) "It is forbidden to talk of the things you are discussing. If you speak of the possibility of remaining in Quneitra then it will be held, but if we all know that this cannot be then it will not be, because it cannot be." I tried to explain to Hannah that although we were fighting for the first line it was also necessary to make contingency preparation for a second line. But Hannah remained adamant : "If a man walks on a narrow plank above an abyss and thinks about what lies in wait if he falls, and looks into the abyss - then he will certainly fall." I replied with all sorts of clever and logical points and it seemed to me that I won the debate, with Hannah remaining in a minority, and also that reality proved that I was right but I have never been able to forget Hannah's words and from the first moment I felt the superiority of her position over mine. This was the superiority of faith and stubbornness ---- the superiority of a deep faith in the power of the spirit to overcome the material. I have no doubt that the hard naive faith of Hannah played an inestimably greater part in the success of Qeshet than did my clever counsels. On that night when we decided, in an "irresponsible" fashion, to erect a settlement the next morning, we also acted on faith and we succeeded.

How then did the Qeshet members agree to transfer to the nursery (west of Quneitra) and how did Tzahal come to agree to that? We knew that there was no possibility of the Qeshet people leaving the bunker of their own volition so it could be handed over to the Syrians. Accordingly we became very tense

when we saw the disengagement map for the first time. The bunker was not marked on the map and the line was so thick that it was impossible to tell on which side the bunker lay. After a few days a qualified surveyor, acting on behalf of the Government, came to mark the line on the ground. The line was to be fixed and confirmed by U.N. representatives. When we saw that the line left the bunker on the wrong side we asked the surveyor if he would move the marker barrels and put Qeshet on our side. The surveyor was greatly offended by the request and explained that to do such a thing would hurt his honour as a "doctor of geodesy."

On the night after the completion of the survey the marker-barrels were moved to the other side of the Qeshet bunker (by residents) and there were also several small movements in other places. The next day U.N. men came and confirmed the border line.

After it had been ensured that Qeshet would remain under Israeli sovereignty movement from the bunker ceased to be a matter of principle --- several days after the signing of the disengagement agreement a delegation from Tzahal command came to Merom Golan. The delegation comprised Chief of Staff Muta Gur, Rafal (Rafael Eitan), and division commander Yanush. We held a session with them in the restaurant shelter. The Chief of Staff explained that the Qeshet members must evacuate the bunker that very day. We asked if Qeshet might be accommodated in the front command building. The division commander said that he needed the building and it was then that the proposal of shifting to the nursery came up.

At first all the Army men were opposed but we took a stubborn stand and the ice was slowly broken. Then

we asked Yanush for railway carriages to ensure that there would be enough accommodation in the nursery. The next day three carriages arrived, carriages which have since made history. From the nursery they were transferred to Hushniye and from Hushniye they were taken by the Yonatan nucleus to Tel Shipun. When Tzahal didn't permit the settlement on the hill they were taken down from it, then going with the Yonatan nucleus to Tel Parag, staying there until they were transferred to Tel Abu Qatif by the Arguv nucleus. There they were confiscated by Tzahal and returned to the Army engineer stores. Recently I heard that Rafal is prepared to return the carriages to the Arguv nucleus---

(v) Merom Golan and Qeshet Merom Golan is a young settlement which has already been through a lot. We have had difficult hours, sad hours and great hours. The first days of Qeshet were the happiest days of Merom Golan. There were very difficult days for us.

Several of our best and most precious people fell in battle, and we lived for months in the shelters. All that we had built and all that we believed in stood in danger. We were isolated - the isolation was difficult. Even the soldiers, tired and dirty from the war and from the attrition, were saying angrily to us : "It's only because of your craziness that we can't return home." Tiredness and disillusionment ruled in the country. The coming of the Qeshet people from Jerusalem and their settling between us and the border (with children !) was almost the only hand sent to help and support us. I shall never forget this.

Only thus is it possible to understand the aid given

by Merom Golan to Qeshet, aid almost beyond computation - to understand how we opened ourselves to Qeshet, how doors were opened, how funds were opened and in chief how hearts were opened.

Today I see that the Qeshet people gave us more than we gave them, despite the fact that there were days when neither they or we understood this. Today we have returned to our homes, to our daily lives ---- I don't know whether you in Qeshet are succeeding in preserving the same spirit. I know that this is difficult and perhaps impossible.

I believe that when stormy periods come again, and they will come --- we can stand again in the confidence that life will continue and succeed, the confidence that Qeshet (the arch) gave us : "and the land was covered by cloud and a rainbow was seen in the cloud."

"Who's Who" and Glossary (in order of appearance)

- |                  |   |   |
|------------------|---|---|
| Yehial Admoni    | - | senior personality in the Jewish Agency.  |
| Rafael Eitan     | - | front commander on the Golan (1978 - Chief of Staff).   |
| Salient          | - | additional area captured by Israel in the October War. Returned to Syria June 1974.             |
| Pinhas Sapir     | - | Minister of Finance in the Labour Government up to 1974.  |
| Hanan Porat      | - | Kfar Etzion resident prominent in the formation of Gush Emunim (1978 - Gush Secretary-General). |
| Tzvi Yehuda Kook | - | Head of Merkaz Harav Yeshiva in Jerusalem and spiritual head of Gush Emunim.                    |

**APPENDIX IX**

**Cabinet discussion on Gush Emunim  
settlement at Qaddum, 5 August 1976.**

**As reported in Yediot Ahronot by Shlomo  
Makdimon, 6 August 1976 P.2.**

**English translation for foreign press  
corps, Jerusalem. See also Appendix II  
for Cabinet positions and Party affil-  
iations of participating Ministers.**

Further details were uncovered last night concerning the Cabinet discussion on Qaddum. Finance Minister Rabinowitz complained that the Qaddumites were making a mockery of the Government, to which Peres responded that he knew of other bodies in the state whose actions made mockery of the Government - even such as "are sitting here on the establishment of saints". Peres is believed to have been referring to those Ministers who keep on raising the eternal question : when will Qaddum be vacated? There is also reason to assume that Peres was referring, inter alia, specifically to his Mapam colleagues - since, in practically the same breath, he mentioned continued violation of the Government's decision on an issue relating to development of the Rafiah salient (Mapam is active behind the scenes to prevent the implementation of government resolutions to remove Bedouin squatters, whose presence is preventing the area's development). One way and another - facts are being established at Qaddum, which could not have been realized without variegated government assistance -- It was against this background that a debate took place at Sunday's Cabinet session; most of the following exchange is now made public for the first time.

- Rabin : The Defence Ministry has helped in things which I'm not sure were a correct interpretation of the Cabinet's resolution.
- Peres : Everything done there - if the reference is to the shed (for metal-working) was about a month before the Cabinet's last resolution (9 May) that no settlement would be established at Qaddum. I propose that if Qaddum is to be discussed and a decision taken - let it be a bold decision. I, as a member of The Cabinet, will fulfil my part in such a decision. But

let there be no bothering with marginal matters, with this or that shed, nor with the provision of employment for the settlers - a resolution taken when they moved from Sebastia, to which the entire Cabinet was party.

- Rabinowitz : (strong opponent of Qaddum) : I think a resolution must also be taken on Qaddum, and that it should not be left unresolved.
- Ofer : (claims Qaddumites are seeking confrontation with the Government) : We have already decided (that no settlement would be established there).
- Rabin : (concurrs with Mapam and other Qaddum opponents but wishes to avoid confrontation) : If you (Ofer) want to resolve on forceful evacuation - do so; I'll not propose such a thing.
- Ofer : I'm not proposing force; I can abide with the existing situation; let it stay.
- Shemtov : But we are giving them work, and creating facts there, as well as passing resolutions here - which we do not observe.
- Peres : First of all, with reference to work - we provide work also for Arabs beyond the green line, and I dare anyone to suggest not providing work as well to Jews who arrived there in accordance with a certain resolution which was not clandestine, a resolution assuring their employment. As for resolutions that are not observed (Shemtov's allegation) - I know of a resolution passed here more than once on (Bedouin squatters in) the Rafiah area, and I know who the factors are that are delaying and preventing implementation
- Rabin : I don't say that a decision on Qaddum must be taken here - but I also don't say that the Defence Ministry should not order things for its requirements.
- Peres : I don't say that we should be sidetracked; or whether there should be a discussion of the matter or not. If you want to pass a resolution on Qaddum's removal - go ahead.
- Rabin : The Cabinet is entitled to decide what it wishes.

Peres : Of course. So, if you want, propose the closing of the enterprise (the shed) and say so clearly. I don't want to be in a position of someone who is in doubt. I personally do not feel myself to be in doubt.

Raphael : Rabin spoke and said something very grave -- what is all the excitement here? These people (at Qaddum) are not sitting there in contravention of Cabinet resolutions. I know of no offer made to them to settle elsewhere, and I'm a member of the Ministerial Settlement Committee. I did not issue them a permit for a ritual bath, because that would provide permanency. But can anyone forbid them water or electricity?

Rabin : They have no problems; they don't need our help; they have a benefactor in England who will provide them with both electricity and water; you (Raphael) don't have to concern yourself about them.

Burg : I believe that any thought of laying siege and starving (Qaddum) is no less grave than employment of force against these people. If anyone wants to topple the Government - go ahead : \* Let such thinking be discussed. And I want to say that these people are there (at Qaddum) with permission, and if they want a kindergarten and school, this should be provided by law.

(It goes without saying that Hamer favoured granting the settlers all requisite privileges)

Yadlin : (outright opponent of Qaddum) : I did not and will not give them a kindergarten.

Rabin : You've done right!

Yadlin : What is called for is a discussion and passage of the previous resolutions - because I see this issue as a political time-bomb; but in no way would I lend a hand to employing Tzahal against Qaddum.

Rabin : Beware what you say, since it leaks out, and it will then emerge (from your statement) that there is a resolution that they stay there.

Kol : (Qaddum opponent) : There's no call for helping them establish themselves into permanency.

Rabinowitz : They are making a mockery of the Government.

Peres: : (see preamble)

The Prime Minister told his colleagues that the issue would be discussed (again) in the Cabinet at an appropriate time - without elaborating.

\* Reference by Burg (NRP) to NRP hint that its Ministers might leave the Government.

TABLE 9:2

Table 9:2

Characteristics of the Occupied Territory Jewish population

From the early 1970's, with most of the settlement sites being or becoming civilian, the character of the population tended to become increasingly typical of similar environments within metropolitan Israel, whether kibbutzim, moshavim or urban areas. Paramilitary Nahal outposts, peopled entirely by young single men and women engaged in military service, quickly became a relatively minor element. The following general observations may be made :

- a) Most civilian settlements consist largely of family units rather than of single people. For example as early as 1974 20% of the population involved in the Golan structure was aged under 14 (Tokhnit Pituah ha Golan, 1974, P.16) compared with 29.9% in the nation as a whole. Post 1974 Gush Emunim foundations on the West Bank are even more family oriented. In December 1976 80 of the 150 inhabitants of the Ofra site were defined as 'children' (Ha-aretz 29-12-76 P.12). Large-sized families (5 or more children) are notable features on this and other 'religious' establishments.
- b) Adult populations are heavily biased toward young people in their late teens, twenties and thirties, especially away from Jerusalem. As an indication, in January 1975 the Golan population of 1908 did not contain a single person above working age. Also, despite the general family orientation, agricultural settlements continue to have disproportionate numbers of young single people (e.g. a clear majority at El Rom on the North Golan).
- c) All ethnic components of Israel's Jewish population would seem to be present in the occupied territory settlement system, though the proportions are probably quite different from the general society - 1) Oriental Jews are definitely under-represented 2) New immigrants, especially from the United States and the Soviet Union, are almost certainly over-represented.

TABLE 9:2

THE SETTLER PRESENCE IN THE OCCUPIED TERRITORIES  
REGIONAL POPULATION STATISTICS, 1978

<u>Region</u>	<u>Number of Settlers</u>	<u>Settlers as % of Arab population</u> (9)
Golan Heights	3,950 (1)	40%
Rafiah Sallent		
a) Yamit	2,000 (2)	
b) Other sites	1,500	
Total	<u>3,500</u> (3)	No Arab population
Rest Sinal	c. 400 (4)	1%
Gaza Strip	c. 200 (4)	0.1%
West Bank Highlands,		
a) Gush Etzion	1,550 (5)	
b) Gush Emunim sites	2,200 (6)	
c) Other sites	<u>c. 100</u> (4)	
Total	3,850	0.5%
Jordan Rift*	3,300 (7)	15% (10)
East Jerusalem*	25,000 (8)	21%
ALL REGIONS	40,200	3%

### Guide

Serozems - highly calcareous soils, deep, grey in colour, sometimes saline.

Solonchak - primary feature high salinity, other characteristics being considered of minor significance.

Rendzina - developed on chalk and marl in mountain regions, shallow, profile generally not well developed.

Lithosol - no clear morphology, consists of imperfectly weathered rock fragments, found on steep slopes.

Israeli Settlement Policy on the Golan Heights,  
1974 : Influences and Action.

Sources:

As for Chapter 7, Pp.215-236.

See also figures 32, 33.

Activities of Israel's Neighbours  
October 1973 Arab attacks, Syrian attrition war on Golan, Oil power exerted via West.

Available Resources  
Severe economic difficulties after war. Inflation/Devaluation

Domestic Forces

Public conflict  
Settler lobby G.S.C. V  
demonstrations and V  
beginnings of Gush  
Emunim.  
War weariness, critical questioning of pre-war policies, including settlement.

Super-power factor  
Very heavy U.S. pressure to make concessions, close U.S. interest in Syrian front.

Golan Environment  
Strategic importance of maintaining watershed line + volcanic hills. Presence of settlements found useful as diplomatic lever → perceived value enhanced.

Historic Context

Israel's suspicion of outside world, legacy of European experience, reinforced after October War.

GOVERNMENT IMAGES

Intense suspicion of Syria, feeling war had demonstrated buffers, settlements, defence lines more important than ever → determination to intensify settlement but recognition of need for breathing space, need not to offend American when wanting increased economic and military aid.

Hard-Line Pressures

Exerted within Govt. factions as well as from outside

- (1) Maximalist opposition forces (Likud) strengthened in 1973 Knesset elections. → leadership - belief in colonization reinforced but recognition international realities not propitious.
- (2) Settler lobbies - Intense effort helped preserve existing structure but insufficient political weight to push beyond this.

POLITICAL SYSTEM

Exerted within Govt. factions as well as from outside

- Cabinet → Minimalist influence enhanced with Ofer as Housing Minister
- War weariness, trauma from 1st days of near-defeat. → Intense questioning of old dogmas resettlements as defence lines, viability of security buffers.

Balance in Cabinet favouring tactical delay in Golan settlement intensification

ACTION

- (1) Buying time - Disengagement success - Quneitra given up but all Golan strategic essentials preserved.
- (2) Programme to consolidate and fortify existing settlements but new settlement projects deferred.
- (3) Readiness to intensify settlement as soon as international environment easier.

Qeset  
Unofficial settlement bid.

**B X T E R N A L  
R E A L I T I E S**

Available Resources  
Economic difficulties continuing - but impact cushioned by U.S. aid input.

Activities of Israel's Neighbours  
Attack from Syria on Ramat Magshamim, Syrian/Palestinian success at U.N.

Domestic Forces  
Hard-Line gaining  
Settler lobby strengthening. 1 1/2 years practise. Gush Emunton fully formed.

Super-power factor  
U.S. attention being diverted - Presidential elections, with need to pacify Jewish lobby + onset of Lebanon Civil War + withdrawal of Oil weapon reducing pressure on U.S. to act.

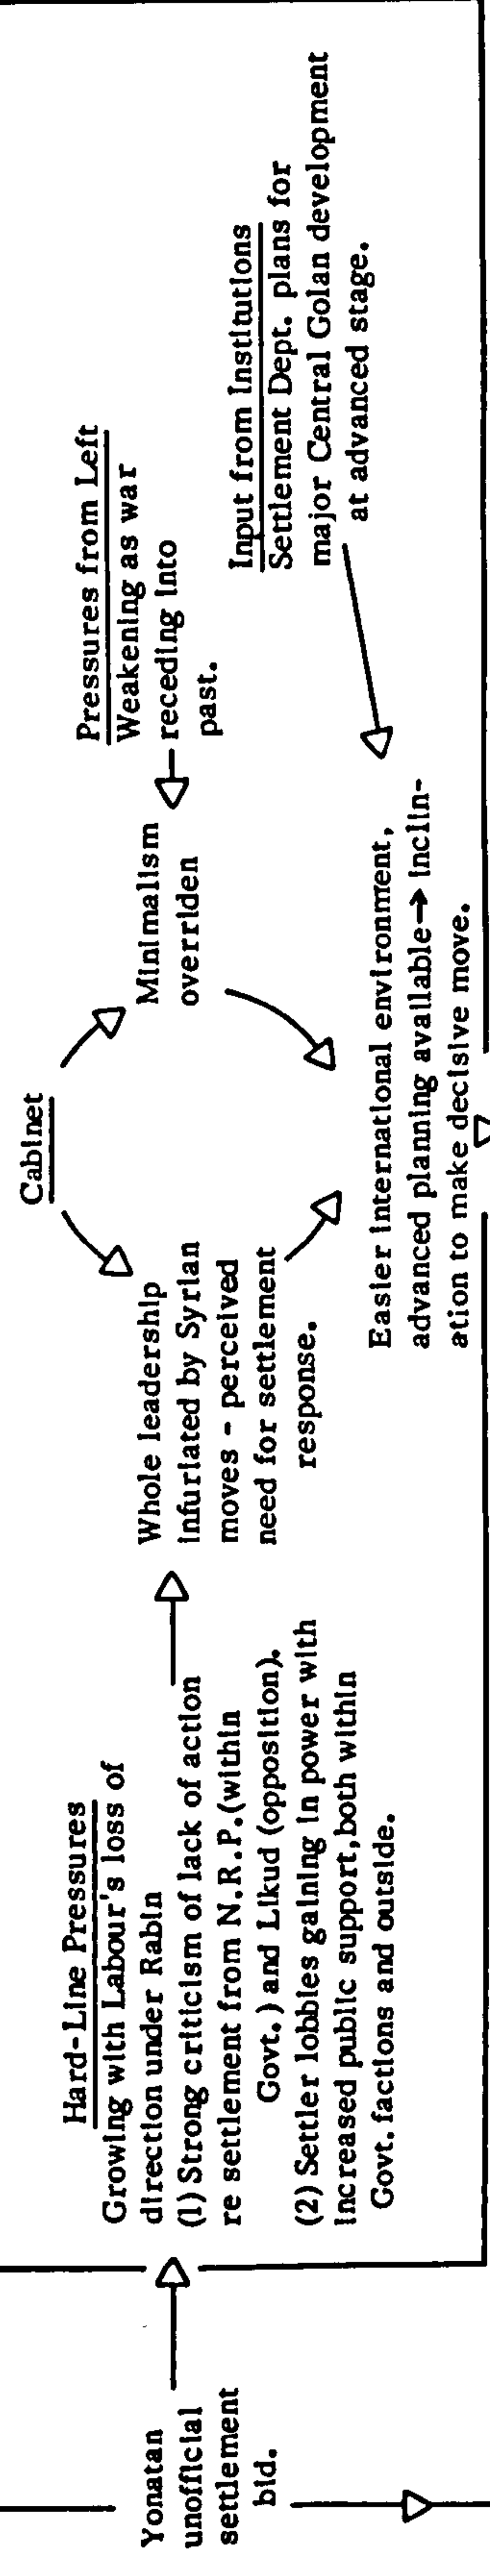

Historic Context  
Suspicion of outside world unchanged.

GOVERNMENT IMAGES

Golan Environment  
Strategic factors + perceived usefulness of settlement unchanged.

Suspicion of Syria continued, feeling war vindicated settlement unchanged → determination to intensify settlement continued - Now with U.S. attention waning + U.S. hold lessening with completion of initial re-armament + determination not to let economy stand against colonization + Syrian provocation → chance seen to implement expansion

**POLITICAL SYSTEM**

Go-ahead for settlement intensification

(1) Determined effort at Qatrin Jan, 1976.

(2) 4 village settlements authorized for Central Golan.
